Use the Markup Assistant to create markup that stays with your drawing. As you work, the Markup Assistant applies markup that's correct, which is added to your drawing at the time you specify it. Create new and edit existing tag formatting. Editable features of tag formatting include different font types, styles, colors, and alignment. Markup and annotation are increasingly important to the communication of design information and documentation. AutoCAD 2023 lets you create and apply markup as easily as you create a line.
