My shell script takes files from folder with names like 2006-08-18-1008_e-170x170.tif I need to convert them to 2006-08-18 what's the best way? in perl? A: date -d '2006-08-18' +"%Y-%m-%d" Give it a try. Update: Given the fact that your file names contain the year, month, and day, the following might also work. x=date -d '2006-08-18' +"%Y-%m-%d" for file in *; do if [${x} = "${file}"]; then echo "${file}" fi done A: Try this function: function date_name() { filename="$1" name=${filename%%-*} year=${filename#*- } date -d `date -d "$year-01-01" +%Y-%m-%d` } A: Given that your original file name is in variable $A, you can use: #!/bin/bash file="$A" # get the year, month and day from filename year=`echo ${file} | awk -F- '{print $1}` month=`echo ${file} | awk -F- '{print $2}` day=`echo ${file} | awk -F- '{print $ 6a5afdab4c

Chargeable USB

Chargeable USB is a handy tool for the users who want to charge a mobile device from a USB port. Although you only need an appropriate cable for this operation, this program enables you to do it even when your computer is in standby or hibernation. The ability to charge your phone, portable media player or tablet from a standard USB port is useful for anyone who travels a lot and does not have access to an outlet or a classic charger. Unfortunately, this option is only available while the computer is running. This app is designed to help you perform the same operation when your PC is powered off by enabling the power for chargeable USB ports. These ports have the option to supply power if your PC is connected to an outlet or has a charged battery. However, in order to do that, your computer needs to have at least one chargeable USB port. While most laptops have this type of port, you should check for the symbol printed on your laptop before installing this program. By default, most chargeable USB ports are turned off in order to preserve the battery power and maximize the standby time. This app is designed to enable the feature by providing you with a simple interface. Although it does not include any documentation, enabling the power in your chargeable USB is an easy task, just like flipping a light switch. If you are having trouble with using the app you can watch a video tutorial with step by step instructions. If your Samsung laptop has a chargeable USB and you want to use it, this application is the right tool for the job.
