EarthView is another 1.5 download tool with an image geospatial mapping engine. However, unlike other similar apps, it is an offline tool that does not require a server. This makes it a valuable software tool for travel and work when you are out of the office and cannot rely on the internet. EarthView is capable of providing the means to visualize and analyze satellite images, which makes it a rather valuable tool for world travel. The app is equipped with many features that can be employed to identify different areas of interest and to search for historical landmarks, borders and other types of information. EarthView is available in two different versions: both provide the same functionality and look for images. However, the pro version has five additional features, such as an integrated OSM-based map that allows for searching, tracking and recording additional metadata. Another interesting feature is a 3D map view that can be accessed in a whole range of orientations. This includes an ability to perform side-view and top-view viewing, which means the tool can be useful even for people who are not particularly good at using an online platform. EarthView can be accessed via an offline installer. The last version of the tool is provided by the software developer and it is free of charge. Updates can be retrieved by users from the World Landmarks Map servers. EarthView Standard version can be accessed from the web. It also has a free version that can be used via an online installer. This version is more basic and provides the basic feature set. EarthView Pro version can be downloaded through the official website, as well as a convenient site dedicated to downloads. It provides a more advanced image geospatial mapping engine. In addition, users can download EarthView patches from the official website.
