All the libraries that are important for the project are pretty solid. However, one library has a very annoying bug in it, which generates a lot of warnings, and even errors in XCode. (The bug is not in the library, I mean, it's not a code error, it's a logic error). I am looking for a simple way, to tell XCode or some other compiler not to warn me about it, so I could fix it and run the app without warnings. I tried to set the flag -fno-warn-library, however, it does not work with the whole project or with specific files, only for the project as a whole. Also, the logic error was replaced with a compiler one: "Implicit conversion of 'unsigned long' to 'id' is disallowed with ARC". Is there a way, to disable this error warnings for specific files or for the project as a whole? Thank you A: Xcode has a build setting: Compile Options (as of Xcode 6) set: Xcode->Goto... build setting Goto Project General Include Guard Optimization Include Guard Macro Include Guard Files Include Guard Macros Include Guard Variables Include Guard Package Set to Yes As result: all files that include this files will be compiled and linked without the warnings. Q: Why does the UIApplication have an "audio" option? The documentation for UIApplication mentions an "
