WiFi Headpone Download

***** WiFi Headpone ***** Wifi Headpone is a server application to replace the smartphone's built-in media player, allowing the smartphone to become a wireless headphone. The built-in function of the smartphone's media player is unable to play content downloaded from external media server. In this case, you can use the Android app on your smartphone to play the content instead. Application Functions: 1. When you turn on the built-in microphone, the built-in microphone can also be used as a speaker. 2. You can delete any media files that are stored in your smartphone by using the application, allowing you to play only new media content. 3. With the built-in WiFi network, Wi-Fi Headpone can transmit the audio stream from your TV or media player to the smartphone. 4. As the app is Bluetooth-enabled, you can pair with a Bluetooth wireless headphone to make the video and audio stream sent from Wi-Fi Headpone reach the Bluetooth wireless headphone. 5. Wi-Fi Headpone can also be used when the smartphone is in the sleep mode. However, you can not make phone calls with Wi-Fi Headpone. 6. When the battery is low, you can charge the smartphone while it is streaming. Wi-Fi Headpone will be charged at the same time. 7. With the built-in Google's Android v4.4, Wi-Fi Headpone can send the video to your TV with a screen mirroring function. 8. When you adjust the volume of the TV or media player, Wi-Fi Headpone will automatically adjust the sound of the audio stream based on the volume of the video stream. 9. If there is a Wi-Fi network available, Wi-Fi Headpone will automatically connect to the network. You do not need to manually enter the connection settings. 10. Wi-Fi Headpone must be connected to a smartphone or a PC before the application is installed. ++++++ If you like this app, you can share it with your friends. If you have any comments or suggestions, please contact support@appgarage.com. ++++++ WiFi Headpone Key Features: 1. Low battery consumption 2. Full support for Android V4.4 and above. 3. Mirrored display 4.

WiFi Headpone Free Download X64

WiFi Headpone License Code & Keygen Free

WiFi Headpone is a useful and reliable server application that makes an Android device act like a wireless headphone. The client device must be connected to a WiFi network for the server to work. The main functionality of the application is to make your phone and your laptop sound like you are wearing a wireless headphone, so as to keep the sound from disturbing others in the room. You can make a connection from your phone to a stereo, television or any other sound source and press the appropriate button to send the sound through to your phone. You can even use your smartphone to stream audio from the phone to your TV, set top box, radio or other stereo or sound device. The latest version supports the new Google Chromecast streaming device also, which means that you can even stream your media (Streaming videos, music, etc.) through your phone to a TV via Chromecast. Here are some more details: WiFi Headpone is a useful and reliable server application that makes an Android device act like a wireless headphone.
