Win Notepad, also known as WinEdit, is a very simple text editor available for both Windows and Mac. It's available in the online market for the Mac, and comes with the basic text inputting and formatting tools and no advanced features or tools. So, it's a plain text editor. Just like a regular notepad, win notepad is easy to handle, and even though it's quite basic, you can still find plenty of reasons why this simple text editor might be the best text editor for your system. Win Notepad Review: Win Notepad is very simple in terms of design and functionality. It includes all the basics for text inputting and formatting, and all of them have been designed with simplicity in mind. The layout of the app is very simple, as there are four areas, from top to bottom, namely: text input area: this is where you'll be writing the text. save area: this is where you'll be saving the result of the text inputting. formatting area: which includes various options for formatting the text such as: font font size color background color paragraph etc. text editing area: which include options such as: line spacing text wrapping etc. The text editing area, in addition to the option of formatting the text, also includes basic text editing features such as undo/redo, undo all, and cut/paste. The most interesting part of this text editor is the undo feature. It simply means that you can undo the most recent input or editing if any, so that if you made a mistake, you can simply undo it and try again. Although the undo and redo options are quite basic, you can still use them with the available tools of this text editor. You can also cut and paste the text if you wish, which is possible with any other text editor in the market. That's not all, the interface of this text editor is quite straightforward as well, and the colors and fonts are simply the same, no matter if you're using it for Mac or Windows. If you want a simple text editor that does what it was built for, no extra features included, or if you just want a plain text editor without any additional features, then Win Notepad might be the right choice for you. Win Notepad is one of the best text editors that you can find in the market
