
Windows Inspection Tool Set Crack License Keygen Free

Windows Inspection Tool Set Crack + (April-2022)

Windows Inspection Tool Set For Windows 10 Crack is a small software application whose purpose is to help you get information about system resources, network connections, running processes, services, as well as other system events. Clean feature lineup You are welcomed by a straightforward layout that simply lists all available functions directly in the main window. They are actually organized in various system tasks, namely System, Security, File System, Network, and Events. In addition, the tool reveals information about the current CPU, free memory, and disk I/O values directly in the status bar. Plus, you may write custom commands in the GUI and run them on the fly. The utility adopts a Vista-like interface where the configuration settings can be easily docked or undocked. An online help manual is available in case you need to find out more details about the setup process. Get system information Windows Inspection Tool Set is able to show details about the OS (e.g. computer name, DNS, SID, time since last reboot, system directory, Kernel data, physical

and virtual memory statistics, BIOS data). Plus, you may shut down the workstation or lock it. In addition, you can check out info about the CPU usage in real time and set the automatic refreshing time interval, get a list with all running processes and info about them (e.g. PID, user, CPU, threads, handles, name, description), terminate the selected running process, manage services (start, stop or pause them), analyze data about modules (e.g. PID, handle, path, entry, size), and view driver info (e.g. name, path, command, load address). The generated details can be exported to CSV file format. Security details Windows Inspection Tool Set reveals a list with all local users, along with data about them (e.g. full name, SID, domain), local groups, as well as logon sessions. File system and network data You can view statistics about drives (e.g. type, label, volume, size, used and free space), local shares (e.g. type, path, number of connections), and remote shares. Windows Inspection Tool Set shows all network connections (e.g. PID, protocol, remote host, remote service) and network interfaces (e.g. name, adapter, type, status, DNS). Configuration settings and performance assessments You can run the utility at Windows startup, allow multiple instances of the program, show event

Windows Inspection Tool Set Crack X64

With this application you can easily view a variety of system features. You can easily view detailed information about various resources such as hard drives, memory, events, network connections, drivers, logon sessions, process starts and exists.
