for android Nov 20, 2008 ddtank v3.4 full cracked (Usman) :, crack : full version Q: Create multiple users with same
Email in mySQL I was wondering if anyone here can help me? I have a table with users stored with user_id,
user_firstname, user_lastname and user_email. I am looking to create an admin user for my website (that just has a
username admin), and at the same time, I am hoping to be able to make another user that will just have the same email
and user_id as my admin user. So the question is, is this possible? I have tried this, but it doesn't work: INSERT INTO
users (user_id, user_firstname, user_lastname, user_email) VALUES ('1', 'Admin', 'Admin','mail@domain.com'); A: You
should use INSERT INTO SELECT. The SELECT clause has to be a comma-separated list of columns. INSERT INTO
users (user_id, user_firstname, user_lastname, user_email) VALUES (1, 'Admin', 'Admin','mail@domain.com')
