FayFont is a free Font Manager which is very easy to use. To start with FayFont you need to run the program once and will immediately receive a new window that will list all the installed fonts. You can select the font to set for Windows, Mac, Linux, Android and iOS, change the font size and choose the font for all the other major platforms, and even download other fonts. This may be quite easy but there is more to FayFont than just the list of fonts. Its features allow you to rotate the text, even scale it up or down, and you can even choose a custom color for text and the background. In addition to the font manager, FayFont also has a number of other useful tools. You can set font to show in bold or italic, generate a random font name and even generate a custom logo. FayFont also has an easy to use web interface that allows you to view and manage your fonts from any web browser. FayFont is available for Windows, Mac, Linux, Android and iOS.
