Quality of life and functioning in patients with ankylosing spondylitis treated with tumor necrosis factor inhibitors. tumor necrosis factor inhibitors (TNFi) are effective in the treatment of ankylosing spondylitis (AS). There is conflicting evidence as to the effects of TNFi on health related quality of life (HRQoL) and functioning in AS. Five hundred forty-four patients with radiographic active AS were followed at six Dutch rheumatology centers. HRQoL was assessed with the AS-specific HRQoL (ASQoL) questionnaire. Pain was measured with a visual analog scale (VAS). Functioning was assessed with the work productivity and activity

impairment questionnaire (WPAI). HRQoL and functioning impairment was compared at baseline, 6 months, and 2 years by group (etanercept, adalimumab, golimumab, and certolizumab). HRQoL decreased over time for all groups, but was significantly lower during the second year of treatment

Please visit our website at portion of the tour site includes a summary of the scientific, cultural and historic impact of the region. Within it, we focus on the significance of the region and discover more about the activities of the people living there. The Apes of the World: Timor-Leste Current Issue This issue highlights the work of SHETR, many of whom are based in Timor-Leste. It looks at the activities of this international non-governmental research organisation and how they are changing the way people view conservation. Timor-Leste The work of the Timor-Leste office is highlighted in the 2016 edition of the book, Field Notes: Extraordinary Places and Their Uses. The UK office commissioned the publication to celebrate the cultural and historical importance of Timor-Leste, as seen through the lens of fieldwork. Field Notes: Timor-Leste Field Notes are, as their name suggests, an incredibly useful resource for on-the-ground researchers and those planning their own fieldwork. We have written chapters about some of the places on our research programme and the people we have worked with and, by focusing on people and their motivations, we hope to offer some insight into the people and place of Timor-Leste. Timor-Leste: a new page Our first visit to Timor-Leste coincided with the country's transition from a state of war to one of peace. Our visit was part of a programme of work with the British Council that focused on the UK and Timor-Leste's relationship with the Commonwealth of Nations, and how this relationship had changed in the past half century. ## **What's new:**

**These Sims are a rogue, either independently, or in a group. They will team up on high performance careers and continue their civilizing, whilst questioning the worth of such activities, their own worthiness, and whether they are fit to be a member of the Sims society. They will however make friends with the Sim you designed, and with it possibly an NPC. Sometimes they will teleport themselves into places to detect activity. They are frequently transgender, gender neutral, and see gender as artistic and athletic qualities rather than as real or imaginary. The two major threat ranges are that of the Office, where they will try to burn you at work with increasing risk the more successful they become in their work life. Now, or some point in the future, they will flee to the city, and may increase the risk of attack by coming here. Or they may attempt to leave the city and grow dependent on the city, perhaps taking a job out of town, and ignoring danger there as well. If you are living in the city, look for spots where they might land, and as such avoid poorly lit or secluded places. Sometimes, one Sims in the group will purposefully go missing, and be replaced with an imposter. They will proceed to converse and engage in normal Sims life as they see fit, and control the imposter until the imposter catches on and they both pursue the same goal as they did. These Sims are likely to be very artistic, and specialize in dance. They will perform in social events such as parties, or they will be hired as the entertainment at one. But they may not be very visible during their time on the job, hence their reason for being hired in the first place, but they will, in the opposite of many Sims, seek to relax and slowly accomplish goals during the day, albeit haphazardly. Through the course of their time, the party may become involved in a mystery, or their goal may just be to experience new things they never knew about. This may mean they will strike or quit a job in their quest, or go to an island on their own. They may find a person of interest, and be drawn into their life, sparking**

**a new interest in their artistic endeavors. They are typically the least social Sims, but they will make friends, often the person who demonstrates that activity that they are interested in. Often, they will teleport or teleport themselves into places to find their intended person of interest, often in cases of privacy.**

ShowUndefinedType_EditorBuilder_a(editorContext, node).createCell(); } } Q: Why is "circumflex over A" in this example considered two glyphs? This is a recurring question on Meta of when comments should use the "circumflex over A". It's usually a matter of 1 or 2 glyphs, and used in closed captions for example. This answer to an unrelated question about language tags clarifies its use with "Å". Is there anything that distinguishes this special case from "Å"? I would think not. The circumflex over A (called "Å") is a phonetic transcription used in cases where it has a specific meaning (assonance, alliteration, automatic quality, etc.). [...] Since it's used in an example where only one glyph is used, my guess is there is another case when two glyphs are needed. Why does this tag exist? A: It was not an original question. It was asked on Meta Stack Exchange - as @Harry Johnston said - but it had no answer. But we have the answer now. Apparently, the question that was linked to was in
