| **POWER DOWN POWER UP** It is a good idea to have a backup plan for what you do to your photos before you start Photoshop. In case you don't like how something looks, you can always go back and tweak it later if need be. --- | --- **Photo Editing In Photoshop** While Photoshop, like all software, has many features to manage image editing, this book covers the most common ones. You can always explore the other Photoshop features on your own time. **Basic Tools** The basic tools in Photoshop for image editing include: \* **Blur** A filter option that adds a blurry, wavy edge around an image or reduces the sharpness of an image, depending on the amount of blur applied. \* **Brush** A tool that enables you to colorize portions of the image with your own color choices. \* **Colorize** Allows you to add color to an image that is monochrome. You can change the color hue to red, green, blue, orange, yellow, or various colors. \* **Channels** Use the Channels tools to take your picture apart and selectively add color to different areas of the image. \* **Color Balance** Uses the two color sensors in the Adobe Camera Raw (ACR) and Lightroom to adjust the color balance of an image. \* **Curves** Use the Curve tools to manipulate the brightness and color balance of an image. \* **Dodge** A filter tool that applies a softer, less-sharpened appearance to an image. \* **Duplicate** Creates a duplicate of the original image and places it on a separate layer for further editing. \* **Gradient Map** A tool that allows you to apply gradient colors to an image. \* **Guides** Use the Guides feature to create and place rulers, guides, and other measuring tools on an image. \* **Hue/Saturation** Select a color from a color wheel, then apply a cool or warm color to a colorized area of an image, or take away color from an image to create a more saturated image. \* **Invert** A filter that inverts the colors in an image, leaving only the grayscale and darkness and making everything bright. \* **Layer** A tool that enables you to place several layers (photos on top of each

Everything you thought you knew about Happy Endings is wrong. Or maybe, you're just not looking closely. The Wrap has a scoop claiming that next week's episode will reveal that one of the main characters has a brain tumor, and last week's episode left out the devious Chuck "to explain why he's not happy anymore." The new finale is scheduled for November 6th. Perhaps that is when we'll finally learn why Chuck is sad and alone? It's not like it hasn't been hinted at in more than a year. I'm perplexed why they would choose a post-finale finale rather than have one last party. I would have expected the show to be over before then. The Wrap also reports that one of the main suspects in the mystery behind the end of Chuck's marriage to Ellie "is going to be revealed." Again, this seems pretty unlikely that Chuck is going to be outed as being the ring bearer. It also seems like a cheap way of burying the dead cat. The final episode has plenty of unresolved conflicts that could be either explained or laid to rest, so if they are going to explain, it better be good. So, are you buying the brain tumor? Are you buying the ring bearer? Are you buying that John Lithgow is going to be the killer? Iggy Pop to join Queen + Adam Lambert on 'Shine A Light' tour Iggy Pop is heading out on the road with Queen + Adam Lambert in support of their new album, A Picture of Me, at the end of June. The tour kicks off on July 7th in Atlanta, GA and ends on August 12th in Michigan. The tour wraps on August 12th at The Fillmore Detroit. Additionally, Iggy Pop will be doing two special performances: July 14th in New York City and August 4th in Washington D.C. at The 9:30 Club.

Measures of the development of mathematical abilities in children with special needs: introduction to a special issue.
