Development In October 2012, Autodesk released AutoCAD 2012.7 and AutoCAD LT 2012.2. AutoCAD 2012.7 offered significant changes, including: 3D Modeling - "Shape tools" such as Plane, Arc, Circle, ArcOf and LineByLine, the latter also known as LINE. first version of AutoCAD to make 3D features mandatory. 2016 Since version 2013, AutoCAD has included a C++ framework, the Rhino Library. In 2016, Autodesk announced the closing of all personal and small business developer accounts. This has meant the discontinuation of such features as the drawing options panel and the ability to create small multi-sheet drawings. It also means that the ability to open the drawing files has been removed. Autodesk

has said that this was due to the small number of registered developers and that the same restrictions will be in place for the future, although the company has not provided a time frame for the transition. Since the 2012.7 release, version 2013, Autodesk has been forcing all users of AutoCAD and AutoCAD LT to use the.DWG file format instead of the.DGN file format. This was announced to the public in late 2014 and beginning in

mid-2015, Autodesk has been offering a .DWG -> .DGN conversion tool in both the AutoCAD and AutoCAD LT applications. With the release of AutoCAD Architecture 2015 (version number 18 or 18.0), Autodesk has also closed the Autodesk Exchange Apps (the exchange service used to find compatible plugins), and has announced the discontinuation of Autodesk Exchange Apps for AutoCAD 2013. 2017 In 2017,
