Direct3D is the primary interface for computer graphics; it can be used for rendering 3D graphics in software. The general term for rendering images with software is software rendering. AutoCAD uses its own implementation of the Direct3D interface, which is called the ADriver. Using Windows PowerShell, a list of all the assemblies installed on a computer can be viewed and manipulated. Native Application Programming Interface (API) AutoCAD's native API, derived from ADriver, is available for non-Windows systems via Autodesk's proprietary API Manager. This native API is a C++ application programming interface designed for use in developing software for AutoCAD. It is not intended for end users to use directly. API Manager The AutoCAD API Manager is a proprietary application programming interface (API) and graphical user interface (GUI) developed by Autodesk that enables developers to create applications that integrate with the 3D architectural design, drafting, and visualization capabilities of AutoCAD and other Autodesk products. It is available for use on Windows-based systems and on the Macintosh. OpenGL AutoCAD supports OpenGL as its software-rendered interface. File formats AutoCAD files are natively able to import and export file formats such as: DXF (Drawing Interchange Format) DWG (3D) PLY (3D ASCII) IGES (3D) STEP (3D) Additionally, users can use applications or add-ons to create DXF files from files in other formats such as: CADM (3D only) CATIA (3D only) Inventor (3D only) Microstation (2D only) Parasolid (2D and 3D) SolidWorks (2D and 3D) others AutoCAD also supports import and export of the following formats from other programs, but the importation mechanism is not as standard as for the native file format: Autodesk Design Review (DDR) S-Plant (a Plant Factory Management System) SolidWorks Part Design MicroStation VBA System requirements AutoCAD is available for download for the following operating systems: Windows 2000/XP/Vista/7/8/10 Mac OS X (10.4 and 10.5) AutoCAD supports the following CPU ca3bfb1094
