1. Field of the Invention The present invention relates to a data conversion apparatus for converting image data, and also to a method for processing and outputting the data.

2. Description of the Related Art In a printing apparatus for printing photographic data, images are printed, for example, by developing an exposed photosensitive material by an electro-photographic process in a developing section and then transferring the developed images to a printing medium, such as paper. Thereafter, in many cases, photographic printing is performed so as to enhance the reproducibility of the images printed on the paper. When a color balance adjustment is to be performed in a printing apparatus for printing images of various colors by using photosensitive materials of plural colors, it is necessary to determine the color balance of each of the photosensitive materials and adjust the respective colors. The determination of the color balance is performed with reference to the color adjustment data acquired from the user, for example.

It's a putt putt game and there's only one thing that matters: the number of points scored on the hole you choose to play. Levels vary from easy to difficult with different hole layouts, you may be lucky or unlucky. Can you win the tournament of the championship? In short, if you like how i play putt-putt games, you'll like how i play this one. Game "GO GOLF" Gameplay: It's a golf game with HONOR GUYS. It's not a normal golf game, you can only hit the ball by spinning it into the air and the "honor" is shown on your screen. The first time you spin it, if the honor number is an odd number, the number of points gained on that hole will be twice the inputted amount. If the honor number is an even number, the number of points gained on that hole will be exactly the inputted amount. After you have gained HONOR, you will be able to get double points for every time you spin a new golf ball. The bottom graph shows your HONOR score (green) and the number of points (orange) you have. The top graph shows your final score. Features: Par 3/Par 5/Par 4/Par 6 hole layouts. All goals are set but may not be fully completed. Choose amongst 14 different golf balls to spin into the air. Throws grass to move your ball and help you get the ball onto the hole. Every level is different from a great design. Hundreds of different achievements. Options screen. Game «GO GOLF» description: This is a simple golf game with no storyline. Here you can spin and throw your golf balls into the air and hit them to hit the ball! Unlike other games, the honor is shown on the screen and you can only have even honor when you spin an even number of golf balls. The first time you spin an even number of balls, the number of points on the hole becomes twice the amount that was inputted. This continues until you either find a hole number that does not include an even number or you get an odd honor number. There are four different achievements, you can see them on the achievement screen. High-Low par game using

& 2 By MizunoThingSource Watch 51 Favourites 2 Comments 457 Views Really, you have to see this to understand. But for a quick summary, this is full-length WWII/post-WWII manga about four youngsters and one of the characters' pet dog who travelled across Europe and the Far East at the end of the war, following this band of messianic disciples who wanted to go to the purest source of life and thus became holy. I guess this would make more sense if I were to re-tell it a bit. All four of the main characters were based of the four goddesses of happiness; Chi-sasane (mixed with his oblivious stupidity and always late), Hikoboshi (symbolizing the goddess of youth, and believing that humans should be able to skip their years), Usotan (representing the goddess of love) and Honeji (representing the goddess of wisdom). But the more this band

travels, the more they start to realize the truth in that "everything is God and God is everything." And by the time these four characters get to the end, they find themselves in a real war zone, with a complete war buddy in tow. There are SO MANY LONG BITS. (left to right): Japanese Deity Xeno-beginner who wants to travel freely without restriction (deep blue "Xeno" on the back) Chinese Deity The Sorceress (Goddess of Creation) The Eternal Emperor (God of Heaven) The Power of Spirits and Magical Creatures (Dark blue "Power of Spirits and Magical Creatures", Spiritual totem on the back) The Cradle of the World (Opposite the Sorceress) The Light Spirit (Silver bodied human magus, standing on a sphere) The Supernatural War Hero (Dark blue white-red "Supernatural War Hero", The King of Kamui) The God's Speaker (half-inch high bronze statue of the dog) The Limitless Water (Dark blue logo on the end of his tail) Those four young men are in the back: The First Immortal (Deep blue dressed human-looking deity with a gold or silver crown, standing on a circle). The Third Fountain (Cool silver "Third Fountain" symbol on his chest) The Second Immortal (Zero-
