```
ALTER TABLE database_name.table_name DROP COLUMN column_name; ALTER TABLE database_name.table_name ADD COLUMN column_name int; CREATE TABLE new_table ( column_name int, column_name2 int, column_name3 int ); COPY TABLE old_table TO new_table; DROP TABLE old_table;
```

Q: Kotlin when using a lambda is returning an error I'm getting this error when I try to create an AccountHandler like this:

```
private var accountHandler: AccountHandler? = null override fun onAttach(context: Context?) { super.onAttach(context) this.accountHandler = AccountApiService
```

```
e.getAccountHandler(context) } override  
fun onDetach() { this.accountHandler =  
    null super.onDetach() } override fun  
onCreate(savedInstanceState: Bundle?) {  
    if (this.accountHandler == null) { throw  
        IllegalStateException("AccountHandler  
            is not set") } } } And it is throwing an
