The Elden Ring, originating from a myth about the beginning of the world, is a role-playing game developed by the newly established company, Unlight Inc. The Unlight Inc. team is a team of game developers and artists with over 20 years of experience in the game development and production industry who specialize in games based on the myth and lore of an RPG world. Currently, the team is comprised of people with a wide range of experience in the production of various genres of games including RPGs, MMORPGs, and Strategy games. Based on the Elden Ring fantasy universe, the company has made a major effort to ensure that the world and gameplay are in harmony with the initial concept of the game, in which the world was first imagined in the creators' hearts. In addition to impressive visuals and gameplay, the Elden Ring game will include a variety of thrilling skills that will give a strong psychological impact to the players. These include a wide array of exciting adventure elements and fantasy elements such as sword fights, beast fights, and PvP battles, as well as the Tregarde (a fantasy race of elves living in the Lands Between). SENDAI™ RENGOU Online Photo Sharing Service Photo by The Sendai Company. The Sendai Company, Ltd. launched Sendai™, a new online photo sharing service for iOS® and Android™, on April 1st. Through its network of partners around the globe, The Sendai Company delivers an easy-to-use, fun experience for users who wish to share their moment at the special moments they care about. Users can simply take a picture or record a video, upload their media and share the media with other Sendai users on the world's first online photo sharing service for iOS® and Android™ mobile devices. With Sendai, users can safely share their precious moments with others around the world without worrying about uploading media to cyberspace by third parties. When uploading, a user can choose the type of media to upload. "Sharing with friend" requires only a name, while "Sending photos to only friends" requires a confirmation code from the user's contact. The effects of oxygen on the cytochrome c oxidase activity of preparations with different levels of specific activity were investigated. The results indicated that the activity of the enzyme was dependent on the initial concentration of oxygen. This is explained by oxygen and/or superoxide radicals reacting with cytochrome c oxidase and forming inactive forms. Ascorbate and catalase protect the enzyme from the inactivation by hydrogen peroxide and oxygen, respectively. The enzyme was inactivated by low-potential superoxide produced by xanthine-xanthine oxidase reaction. Oxygen-induced inactivation of cytochrome c oxidase is absent under oxidizing conditions or when oxygen is generated by xanthine-xanthine oxidase reaction and inhibited by reduced
