The game will also support FIFA Club Draft, which uses rules and pools similar to those used in real-life professional club football, to pick players from the best-selling games console and PC football titles. The game will also feature gameplay set-pieces, such as free-kicks, corners and throw-ins, and new player control options, such as over-the-top or backwards passes. "With FIFA, we focus on the very best football and bring the player the best player experience with every game," said Aaron McHardy, Executive Producer, FIFA. When you take all the detail and emphasis that EA Sports has been putting into making the most technically advanced football simulation on the planet, to be able to hear players' boots squeaking on the ground from the other side of the world is a very special moment." With the previous game, FIFA 19, EA Sports only used a combination of player models and physics to simulate player movement. FIFA's motion capture director said: "Our previous efforts in the areas of player movement and positioning were impressive, but they didn't exactly communicate realistic player behaviours." Eric Chahi, EA Sports lead character animator, said: "Every feature in FIFA has had a clear goal, whether it's a new passing logic,
