FIFA Career Mode FIFA Career Mode is a new way to simulate your true career as a player. The Game decides which club you can join, taking into account your abilities as well as your standing in your country's domestic league. Whether you are a young prodigy or a seasoned veteran, you'll play an important role for your new club throughout an entire season, which includes a regular league season, the playoffs and even the Europa League. Keep winning trophies to earn endorsements to raise your star rating and unlock various player attributes. All this will be enriched with a new Career Meter, which allows you to monitor your player's progress over a season. Single Match Single Match is a new mode that lets you play in one-off matches with the most authentic, realistic football feeling. The Game decides the final outcome based on the score at the end of the match, with precise control over every aspect of the game, including changes on pitch, tactics, and substitutions. Replay every moment with pro replays, which are fully customizable. New Faces FIFA is built from the ground up for 2018 with a number of completely new features, including a new female player model, new faces, and improved lighting and stadiums. "With the start of the new season, we are excited to introduce an entirely new gameplay experience to the game," said EA SPORTS Senior Producer, Dan Marshall. "Our goal was to set the bar higher for the next generation of football and our first steps show a more creative approach to football gameplay. It was important to us that a new season means a new beginning for everyone, and we hope that both our players and their clubs are excited to experience what FIFA 18 and Fifa 22 Cracked Version have in store for them." FIFA Ultimate Team FIFA Ultimate Team is back and better than ever, and there are more ways to build your dream team than ever before. The highly-requested Stadiums feature is now available in Ultimate Team, giving you the ability to build your own stadium and customize your favorite team. Add your favorite players from the biggest clubs around the world. Then use special cards to equip them for matches like a champion, or create your own team of players made to order. As your squad gains prestige, you can unlock more cards, while earning experience for your players. You can also take your ultimate team to the field by using custom Training Cards. Features Key:

- New game engine with HyperMotion™
- Brand new animation, featuring the most realistic and detailed player faces
- Face-tracking technology that enables players to react to every tackle, kick, pass, and dribble.
- Referee Dashboard – now you can focus on refereeing as your matches progress including sending offs, VAR decisions, penalties and other notable incidents right from the trailer
- Analytics – Learn more about the players in your squad, whether you're playing against friends or the AI.
- FIFA Live Moments, which now captures the chaos of high-intensity battles and tackles to keep you immersed for years to come.
- Additional broadcast camera angles including overhead and C-Pad deploys
- Over 250 new uniforms and authentic kits
- Improved performance throughout the game
- Quick Response and improved artificial intelligence in challenges and goalkeepers
- New Formation IQ System – positions and formations are different in every single scenario. A new system compares the players in every position depending on their playmaking skills, technical abilities, defensive capabilities, and creativity. Utilizing soccerintelligence, you will be able to set formation quickly and predict the most appropriate tactics for your match
- Improved Exhale System – covers player breathing patterns when sprinting or dribbling.
- Improved Dribbling, Aerials, and Crossing.
- AI team 'intelligent opponents' and human opponents.
- Fine-tuned positioning behaviour of players and AI teammates. The tactical repertoire of players is honed to ensure the players put their skills to the test.
- Improved Player Sacks and Interception.
- Retrieval. The AI now anticipates and makes better decisions on where to intercept the ball.
- Improved Shooting. High degree of accuracy.
- New Crucial Conversations with the opposition.
- Improved Ball Control, Dribbling, Creativity and Pace.
- New Systems for Offside Decision.
- Flexible Timing controls that adapt to whatever playstyle you prefer.
