In the past few weeks, I've been spending a lot of time going through my archived PC game collections. I collected Over 40 games on my PC from time when I moved to the PS2 and found most of those games were already released. The same holds true for newer game systems like the Wii. So it's been fun going back through and finding games that are relatively obscure. Without further ado, here's my list of Top 10 Obscure PC Games: We take you to the height of your interactive abilities with the Nintendo's wii system. Completely revolutionary, the Wii delivers console-quality games, the best multiplayer gaming experience, and a control system that takes innovative game-play to the next level. Play by bouncing and swinging the wii remote in the air, and capture the true essence of motion gaming with your eyes, ears, and feet. Welcome to Easy Driver Club Like it? Shares it!
