The game will be set in a crazy mansion, which in fact is the inside of a spaceship. Explore the mansion and solve puzzles to find eight energy cells and get out of this crazy dimension. You are the only surviving passenger of a stolen spaceship, which just crashed into a planet. Now, don't worry, because right now you are in a state where you have no consciousness and are not aware of your current situation. All you will be interested is to get well enough so you can leave this dimension and return to your home planet. You will need to explore the inside of the spaceship to reach the escape pod and then figure out where you came from. There will be many adventures as you take on the roles of a fellow who is crashing into the house he built... Features: - 15 rooms inside a spaceship - Tilt based shooting game - Classic gameplay from the genre of weird puzzlers - Solve puzzles to go deeper into each room - Relax and explore - Many different challenges - Solve challenges to get keys to progress further - Compelling story - Extensive encyclopedia of alien mythology - Sound effects - High quality graphics - Multiple endings - Free build and controls - No in-game purchases - Play anywhere, anytime Story: You are an astronaut living on a space station orbiting a planet. Your starship has been stolen and you must find it to get back home. Just like in any other space-flight, the star-ship captain goes into a sleep state to go through the final stages of the journey. On the spaceship, you have been assigned to the third watch-stand, which means you have to be ready to wake up the captain, if he should fall asleep. Your job is to prepare the spaceship for launch. When the captain wakes up, you need to draw and explain all the current information related to the journey. During the trip, you will have to be prepared for any emergency... Mansion: You arrived at an abandoned manor after the spaceship crash landed. Now it is time to explore the place and collect objects of interest to make the journey easier. You will learn about the place and its secrets, and find objects of interest. Finding the wrong objects can lead you into trouble, because they have their own purposes in the game. So you will need to solve puzzles to get the right objects for the right purposes. How to play: c9d1549cdd

===== You can enter "Forge" by a friendly "mountaineer" who runs the ride. When he turns on the ride, you can choose to join him. The first time you enter "Forge", you have to give him the requested sum of 20 Euro. You can decide whether you want to enter the ride as a guest or as a member. The "mountaineer" tells you that he has been scared of heights as a child and never gets a thrills from rides. He offers you all necessary safety measures, such as those in the VR3 video game, before starting the ride. After you have entered the ride, you are not physically inside a car. You find yourself in a small, submersed cage. You can stand up, sit down or lay down in the cage. Depending on your weight, your speed and the position of the seat, your maximum acceleration can easily reach 200 km / h, which corresponds to an air pressure of around 0,1 mbar. The riders in the ride are "protected" by a protective screen, which can easily withstand the "acceleration." You are not inside a boxcar, but in a walkway and ride on the platform. This means that you have a 360 degree view of the environment and can see that you are floating in the water. Your seat rotates around one of four axis. On the four axes, you can also turn around, which makes the ride feel more realistic. In the ride, the G-forces reach values of up to 6 G. An absolute maximum of 17.5 G can be achieved in a matter of seconds and causes a very long, intense sensation. Special Rides in the vicinity of the ride "Forge":

===== Crossing the thundering Tschößen falls. A high-speed ride on a bungee jumping platform. Here you can also see the "Sturmvon der Steigen" a bungee jumping ride, a heart-pounding ride and the "Duisken" water slide. TECHNICAL DETAILS: ===== - game version: 1.0.2 (read the title screen for the required VR3 game version) - filesize: 2,4 GB - maximum speed: 0,9 m / s - maximum acceleration: 2,0 m / s<sup>2</sup> - maximum G-force: 6.0 G - maximum weight: max. 250 kg

## **What's new:**

**Dogfight Elite, also known as Elite Squad, began as a series of action figures created by Archie Goodwin and Tony Verhoeven, for film-maker Joe and Sons from an idea pitched by Verhoeven based on a Japanese toy called Gunzei Smash Master figures. Released in August 1979, Elite Squad characters Ernie & Raymond functioned at first as a comic-strip within the magazine - they would appear several months after the issue featuring the characters that contained an interview with the toy manufacturer. In January and February 1980, a series of one-shot comic-strips were published featuring the characters creating street crime - in the process, Ernie & Raymond proved their value as action figures when they easily disposed of a team of five police officers. Gunzei Smash Master then granted the filmmakers permission to use the Elite Squad name and characters to create a television series and, by 1983, was contributing to one of Sky One's most popular programmes - The Wizz Kidz - a comedy/action show! The series even featured a dual action with two actors performing action man roles in unison. The series proved that action figures could serve a major entertainment role - and, possibly, a place in the lives of young boys. With more than 100 toys released between 1980 and 1987 - Volume 2 includes many stars such as The Saint, Monster Squad & The Texas Chainsaw Massacre - the Elite Squad joined Mr Teenage Mutant Ninja Turtles as one of the best remembered action figure lines. Volume 2 also includes The Linea, which later spawned a toylines for Playmates Toys. Originally published in the UK by Editions Varier, the Elite Squad books were then reprinted by Ocean Publications who re-issued the first volume alongside new volumes detailing the characters Dirk & Dilly and the Brazzers. A second series of Elite Squad titles was produced by Speakeasy Productions for Comic Images. In 2001, C21 distributed a series of Elite Squad cards that incorporated a miniature cut-out of the action figure and a children's title. Sadly, this series, like the other UK publication of the book, was never available in the US. The Elite Squad cards were also re-released in 2004 from the US publisher Speakeasy Productions. This game is a turn-based FPS with Real-Time Multiplayer (RTS) elements. In the interest of the full experience, I recommend playing the multiplayer version before downloading the single player version, and vice-versa. Our multiplayer version allows up to 8 players to battle it out in the same map simultaneously. We also offer free-play and team matchmaking options, but this content is DLC. Donations Welcome! Many of the great features that make the Leadwerks products unique, are developed by volunteers. If you like what you see, why not consider donating a little to support this work? Installation instructions for Windows Download and install the Leadwerks SDK, available for Windows, Windows CE, and Linux. Download the Leadwerks WS Client. Download the FPS Weapons Pack and install it into the Leadwerks WS Client (under "Tools" > "Mods" > "FPS Weapons Pack"). Load your project into the Leadwerks WS Client using the "Load Project" dialog. You will be asked for the location where you would like the project file to be loaded. Navigate to the folder in which you wish to keep the project, then choose "Choose" from the file chooser dialog. Finally, if you need more information on how to create a new Leadwerks project using our projects manager, look here: To configure your game in the Leadwerks WS Client, navigate to the "Game" tab. Click on the "+" button at the bottom left corner of the game. Choose the menu item "FPS Weapons Pack" (this item can be found under "Tools" > "Mods" > "FPS Weapons Pack"), and press the "OK" button. To configure the map, navigate to the "Map" tab and click on the "+" button at the bottom left corner. From the map you have just created, right-click on the space in which you would like to place the weapon you just added. Choose "Add Object" from the context menu. Select "Dynamically Added" under the "Object Type" drop-down menu. Once a weapons object is added, it has a "+" icon in the lower left corner. Drag it to wherever you want it to be
