## SQLCE Database Viewer Free Download [Latest]

Combine the power of Visual Studio 2005 with the convenience and connectivity of Windows Mobile 5.0, and the result is SQLCE Database Viewer, a useful tool that will allow you to manipulate data in SQLCE.sdf databases without need of a Pocket PC. The application is built using the .Net Compact Framework and SQL Server Compact Edition databases. SQLCE Database Viewer is a handy tool that will allow you to view and edit data stored on your Windows Mobile Pocket PC. All of your databases (including SDK-provided databases) can be seen and edited,

---

and the SQL query window, as well as a list box will be used as the GUI. The idea being that you enter a SQL query and have the application perform the necessary actions. When the query has executed, the results will be shown in the list box (using tabbed columns, so you can easily manipulate the columns), and a subset of the results can also be shown on a web browser component on top of the main view, or you can opt to view the results in the default Pocket PC screen behavior.

### SQLCE Database Viewer Features:

- \* View.sdf SQLCE databases
- \* View data in the data tables in.sdf
- \* View data using SQL query
- \* View data in the database

---

in web browser \* Choose to view all tables in the database or just part of them \* Import sample data to the database \* Import sample data to any of the database tables \* Quickly refresh the tables in the database \* Quickly refresh the database \* Visualize your database \* Create, edit and delete.sdf databases \* Quickly import.sdf database to local database \* Create, Edit and delete the database \* Access to the database as a local database (compatibility with SQL Server Compact Edition 2005) \* Import all sample data to the database \* Import selected sample data to the database \* Import selected sample data to the

---

database \* View the database (in a dialog window) \* View the database (inside the application) \* Create new databases \* Edit databases \* Delete databases \* Import any existing databases (in a dialog window) \* Import selected databases (inside the application) \* Export any existing databases (in a dialog window) \* Export selected databases (inside the application) \* Import any existing databases into a new database (in a dialog window) \* Import selected databases into a new database (inside the application)

**What's New in the SQLCE Database Viewer?**

- View your SQLCE databases

---

locally - View and add test data to SQLCE databases and.sdf files - Add wildcards to SQLCE tables to quickly find and filter tables - Edit the data on the fly - Test your edit before pushing to the server - Create scripts to push new data to the SQLCE database directly or to an.sdf file using the native SQLCE tools - Submit to Twitter or Facebook using Twitter/Facebook buttons SQLCE Database Viewer Screenshots: SQLCE Database Viewer Features: - View and edit SQLCE databases locally - Quickly add data to SQLCE databases from Desktop - Quickly look up data in SQLCE databases and.sdf files - Add wildcards to specify you want to

---

see all rows in a table, or only where a field = a specific value - Edit the data on the fly - Submit changes to the server using your choice of Postback - Create table scripts to bulk insert rows into SQLCE databases - Test your change on the Desktop before submitting back to your Pocket PC - Create scripts for dynamic URL creation to send data to the server - Twitter and Facebook integration to make sharing your update easier - Export and Import scripts to copy data from one database to the next (back-up/restore) - Synchronize with Multiple devices using Windows Mobile connection protocols - Compatible with 64-bit

---

Pocket PCs (Windows Mobile 6) -  
Creating Test Data: - Create sample  
data on the fly - Submitting Data: -  
Submit data for easy review -  
Upload to Twitter or Facebook  
License: SQLCE Database Viewer is  
(C) 2011, all rights reserved - this  
software is licensed for use solely  
for educational purposes and for  
demonstration, review and  
evaluation purposes only. Just  
before the Mobile developer  
meetup I uploaded some patches to  
get this to work on 6. Note the old  
SQLCE provider is needed as the  
data binding subsystem was not  
modified to work with the new  
version. Known issues: \* data  
binding to pass data off the phone

---

(power) \* daclexpress/sdk does not provide a TraceWriter \* data binding fails if you change your device while the application is running \* there is no documentation as to how to handle unsupported stuff \* sqlservermobile2005 queries are supported, but not managed queries. \* You can not create a connection directly to the provider. What

---

## System Requirements:

Minimum: OS: Windows 7 / 8 / 10,  
64bit Processor: Intel Dual Core /  
AMD Quad Core Memory: 4 GB RAM  
Graphics: DirectX 11 compliant  
video card with at least 1GB VRAM  
Storage: 10 GB available space  
Recommended: OS: Windows 7 / 8 /  
10, 64bit Processor: Intel Quad Core  
Processor Memory: 8 GB RAM  
Please note: The installation
