Running about a mile beneath the surface of Earth, Creature in the Well is a fiendish pocket dungeon about answering the call of the dark deep. You must navigate through the underground labyrinth and collect crystals to continue your quest. And of course, you must make sure you don't get stuck down there... "Creature in the Well is a terrific game with a unique world and excellent atmosphere. You're not just tapping on a screen in the dark, but actually running through an ancient masonry labyrinth." – Mike Fahey, Examiner "Creature in the Well gives first person dungeon crawls a run for their money." – Paul O'Brien, PC Game Creature in the Well is a New Zealand adventure game about exploration and discovery, delivered with the platforming style of great games from the 16-bit generation. At its heart, Creature in the Well is an RPG, and a deep one. You can spend your time traveling across randomly-generated levels, with optional side missions along the way. Or, you can hunt down the keys to every room, digging down through the layers of the dark, stone maze, in search of the ultimate prize – the thing that dwells within. Key Features: Non-linear gameplay A dark and foreboding world Many secrets to discover Progress your character's unique skills and attributes An immersive musical score Close to 1000 words of story Replayable mini-game, with multiple endings Keyboard and mouse controls In 2001, David Law and Adam Volker created an original concept for a "dangerous and dramatic" game, with no traditional heroes to save the day. Creature in the Well was originally published by A-Light Studios, then later, Caroline Games. In 2007, developers Adam Volker and Bohdon Sayre took over Creature in the Well for rerelease and re-branding as On10. Back in the 1980's, Adventure games were king. When computer consoles started to gain a foothold, the genre saw a revival. Many developers began creating titles in this style. Among these, On10 did not rest, and decided to take their vision further. Their next game Mortuary designed to be a frightening

SushiParty2 Original Soundtrack For Windows

The Adventures of Capitano Navarro is an action dungeon-crawler with a top-down view mixing the language of comics with the Renaissance theater. The story of the game is inspired by Medieval tales and contemporary fantasy novels. The world of "The Adventures of Capitano Navarro" is set in an arid environment where the atmosphere is marked by an oppressive heat. Peru, the most advanced nation on the Earth, was in its glory time. The Incas had conquered the land, developing it into a huge and high-tech empire. However, before their death, the Incas had entrusted the preservation of their riches to the descendants of their most faithful slaves, the legendary and courageous Fangos. Now, the Fangos are reawakening the magic of Peru and resurrecting fauns and centaurs, old mythological creatures with the power to transform into the weapons of war. They also seek vengeance against the Incas who captured and destroyed their kingdoms. Meanwhile, a secret organization has allied with the most powerful of them, the king of the Xaratus, a nation of chimerical lands on the edge of the oniric lands where the Atlanteans, the most ancient and mysterious civilization on the planet, had their offshoots. Now, the chimerical nation of Xaratus has taken power by fusing its legendary tree with the Atlanteans' tomb. In doing so, they created the legendary "Juplatan", the tree of life. The Juplatan is a source of power that transforms into any weapon the wielder desires. However, the descendants of the Atlanteans can use the powerful Juplatan to defeat the chimerical kingdom. The descendants of the Atlanteans plan to do so by capturing the fairy queen Verdefolhas and destroying the Xaratus. However, Verdefolhas is in possession of the "Juplatan", she is connected with the beings of the oniric lands, and she was created by the Atlanteans. Thus, in order to save Verdefolhas from the enemy and save the magical tree, Capitano Navarro must defeat the enemies of the fairy queen and face the most formidable enemies in the world of fantasy. ● Important!● The Adventures of Capitano c9d1549cdd

What's new in SushiParty2 Original Soundtrack:

Airline, now known as RCAF Air Veteran, has seen its fair share of six- and seven-figure deals over the years, and now a much-publicized summer deal with Swissair has pushed the competitive corporate fare war toward Ontario. What the nifty aviation aficionado hasn't seen yet, however, is a deal between the two major airline players in Canada. St. John's, N.L.-based Sunwing Airlines Ltd. and Toronto-based Air Canada have ignored waves of competitive airfares in the lead up to the 2012 summer travel season and turned their attention to much larger deals, according to RCAF. The new St. John's-Barrie-Toronto-London route, announced by Air Canada, should boost air travel in Canada's sixth-largest source of traffic. (CBC News) RCAF Air Veteran is taking the added offer to swap routes with Air Canada, and Switzair will be getting a large chunk of the custom and the added traffic, according to spokesman Rick Gates. Switzair already flies between Toronto and Zurich, and will be boosting the Toronto-Barrie route, the same one Air Canada will be flying between St. John's and London, England. In that deal, RCAF will fly an Airbus A321-220 twin-engine plane configured with 12 first class seats and 50 economy seats, Gates said. RCAF will be outfitted with more than 50 Avro CF-188T Vipers and associated equipment such as navigation, communications, and ground services. The new Toronto-London route, which should launch sometime in late summer, will also dip into the Atlantic Ocean for refueling. Air Canada and Switzair also each have a dormant Atlantic City-Toronto route. Air Canada already uses that

Atlantic city slot to fly between Ontario and Bermuda, whereas Switzair hasn't really taken advantage of it. Switzair also already flies a limited Atlantic City-Wilmington route, and could be planning to exploit that slot. Switzair currently has a very strong presence in Canada, with five bases on the Prairies, and six international bases.

"I'm sure that's a possible route to consider," Gates said of a possible AC-Toronto-Atlantic City-Toronto-Zurich-Switzair Toronto-London-Atlantic City route. TC Air Though Switzair's terminal at Billy Bishop Airport has already been designated by Transport Canada, as the home base

Sentenced VR is a visual novel developed in Unity 5.6.2. The game is set in a fictional early-modern European city where you play the role of the town executioner. The story unfolds through a series of simulation based narrative choices, and the game experience is structured around several key existential choices. PROGRAPHY Working title: Sentenced Development Lead: Samuel Gordon (me) Developers: Kevin Ellis Writing: Samuel Gordon Programming: Samuel Gordon Themes Social psychology, obedience, and the freedom of the individual Systems Sentenced is a one off, interactive, narrative experience. It is a game about personal conscience and obedience to authority. The player is able to manipulate situations and agents within the game, as well as themselves. The player is ultimately responsible for their actions and the consequences of those actions. In addition, the main narrative is a story of individual freedom and the freedom of the individual. The player is able to change the plot at any time through conversation and choice. GAMING SITUATION The game is set in the fictional city of Ulrichshafen in the year 1589. The player is cast as the town executioner of Ulrichshafen. You will choose the crime of the day, then execute the

prisoner. There are five potential crimes to choose from, which can lead to a range of possible outcomes. Stories There are multiple stories within the game. Each leads to a different outcome, and each plays out the same overall. The player can make several different decisions throughout the story and thus experience multiple stories from the same crime. SOUL Sentenced is a narrative experience in which the player controls the actions of a character called the "principal". The principal is punished for the crimes of the player. In this way, the game is a metaphor for a "soul". The principal can be the player, the protagonist of the main story, or a character under their direct influence. GAMEPLAY Gameplay is structured around six key decisions the player must make. These decisions span all aspects of the game from killing to dialogue to decision making. Decision 6 key decision the player must make. This is both a narrative and gameplay decision. Interaction Completely interact with the world of Ulrichshafen, and the characters that live there. DECISION The decision is a choice made in the game that alters the direction of the main story line.
