Neonatal periventricular haemorrhagic infarcts affecting the Pons and Middle Cerebellar Peduncles. Periventricular haemorrhagic infarcts (PHIs) are widely accepted as the underlying aetiology of cerebral palsy in early childhood, the most common cerebral dysfunctions. The occurrence of PHIs with evidence of primary damage to the cerebellum has not yet been reported. We describe neonatal PHIs affecting the pons and/or the middle cerebellar peduncle (MCP) and comment on the underlying parenchymal alterations. Twenty-four neonates with PHIs involving the pons and/or the MCP were identified in our surgical database for the period 2001-2005. There were 13 boys and 11 girls, with a mean age of 35.6 +/- 3.9 days (range 29-37 days). Six of the 24 PHIs were associated with germinal matrix haemorrhage; 10 were acquired, mostly through perinatal hypoxia-ischemia. Primary infarcts were identified in 17 infants. Aetiology of infarcts included branch atheromatosis of the ascending aorta (3), moyam

## **What's new in Tilefinder:**

**Mist What is this African Flower that grows on the Silk Road through China, Vietnam, Burma, Indonesia, Malaysia, the Philippines and the Far East? Come to see the beauty of Kitaria Fables (*Actinidia arguta*). It comes from a latitude of 31°N to 38°N on the Far East side of the Himalayas where it's usually seen from this side of Mount Everest on the Tibetan Plateau. It has a name "Chu-Khueh" in the Chinese language and it's one of the major forest tree species that grows on the Silk road throughout South East Asia, including Myanmar, Malaysia and Singapore. It's also called "Kaki-Toho" by the Japanese. Mountains and rice paddies When visiting Taiwan, the scenery is never the same You've got to love Taiwan - it's a country rich in history and culture. It's a highlight on any travel itinerary in East Asia, however often the beaten track. There's a wine village for every wine lover and Taiwan is no exception... with so much to enjoy - wine, craft beer, unique street food, regional baked goods, sweet/savory wines, tunnels, hot springs, seven-star hotels and even a home for owls! Taiwanese 'treatments' Taiwan is full of various traditional practices such as foot massage, acupuncture and health food. However, both a standard massage and a standard facial will only treat the body and not the face, in my mind that is the #1 damage indicator in every person! Anyone who travels has a 'face condition' and I think it's fair to say every face at birth, and at birth, includes wrinkles and frown lines. Yes, recovery from plastic surgery is great and a better option if possible. Aftercare, in my experience, is similar to any other medical treatment. And the patient will still have the same physical condition as after any**

**other treatment. A tingle treat And then there's Taiwan's Hot-Spring style! For \$30 Trish gives her tips on how to experience Taiwan's Warm Red Toner, Tai Ching Golden Toning Massage, cold rice milk dip, and also, a 3-hour Soaking Bath for \$250. Trish's Soaking Bath is done in the modern, science-based manner where cleansing and toning is not strictly due to the bath**

The game world, known as Dokuro, was altered by some unknown force, causing events to happen in a different timeline than our own. The chaos this caused led to creation of the Diamond Eyes, a group of psychics who control the Dokuro. As a teenager, our hero wants nothing more than to rid the world of these psychics, and so he sets out on a quest to uncover the truth behind the world he has been sent to. The original version of the game was a visual novel: anime, with user-selectable dialogue and a few story arcs to follow. It features lots of unique art, with no pre-drawn backgrounds and unique illustrations everywhere. There are many choices to make that change the story. Key Features - Control over dialogue with a choice tree; go for one-liners or keep your thoughts to yourself - Canons-based story where arcs follow a certain character's development - Visual Novel style with full fledged game mechanics, multiple endings, and several unlockable bonus scenes and illustrations - Dialogue controls - Ability to unlock bonus scenes and illustrations if you play through the game multiple times (if you play the game for 50+ hours of enjoyment you get to see all the extra content!) - Game will not be released digitally until the visual novel is finished, which is currently scheduled to be finished in December 2013 (April 2015 in Japan). Play as the people we use to be, but are no longer. When our hero wakes up in a strange underground world, he'll need to work through events that appear to be unfolding differently from our own. At the same time, his fellow travelers of an ancient order will try to stop him from his quest. This is a horror game where your choices matter. Features Different story paths, complete with different endings Permadeath, in a horror game - no save progress Control of player character and objects in the world 200+ different creatures and enemies 9+ hours of gameplay About This Game: We are obsessed with a different kind of horror. The game that has been a favorite of horror fans since it first released five years ago. The horror game with no save progress and no quicktime events. The one where you can play out the story in any way you choose. The game where you are the person, and the world is the other. What if you could change the things that made your life terrible? You are a 'hero' of sorts, called
