Winner of a Golden Joystick award, the award for the Best Video Game Strategy, Traffic Giant comes from two lengths of the disc: A five-chapter game and three mini-games that can be played at anytime throughout the rest of the game. The five-chapter game has players take control of nine trucks from across the world and give them a fair shot to win... Shoot 'em up, action, action, fight, battle, and lots and lots of bullets! Grab your iron sights and your sword, and get ready to face down the invaders! Leaping over the countryside in your Dragoon jet-powered tank, blast your way through hordes of aggressive enemies all intent on crashing into your big, beautiful country. You can't build bridges to cross your enemies, and you sure as heck can't turn back to defend yourself! Your gun is the only weapon you've got, and it's time to find out just how tough you can be! GAME FEATURES: • 3D environment that is easy to get into • Upgrade your weaponry throughout the game • 6 enemy types to take down! • 9 different environments to experience • Bosses to take down • 3 Game Modes Meet the little kobold king, Kubulus, and his army of doll-like creatures as they roam the land. As the King of the Kobolds, you must lead Kubulus' Kobold army on a quest to secure the lands and save the world. Being an action game, all moves are made via the analog stick with a limited number of attacks from your four martial arts weapons: a wooden bat, a rope, a rolling pin, and a spiked club. The vehicles can be used to traverse the world map, and you must find a way to get from one area to the next, as the environment can often be quite hostile. Kobold King is a fast-paced action/platformer that is easy to pick up and play, but also challenging enough to keep you coming back for more! KEY FEATURES: • Classic action game with a Kobold theme • Kobold King is all about fighting the bad guys and saving the world • Action packed game with unique gameplay mechanics • Challenging puzzle-like gameplay • Non-linear story plot Packed with so much traveling that you'll wonder why anyone ever uses trains, Trains of the Aurora is a great time

This strategy game was designed to be very educational, especially for kids, in fact I used to play it with my own son. It is a very light strategy game, with nice and quick gameplay, and clear and logical graphics. When you start as a beginner, you can take your time, learn, and advance through the game. You will first need to learn how to build your own star maps and how to plan your economic, military, and diplomatic strategies, so learn about the different ships, shields, weapons, and devices. I would recommend the game to anyone who wants to spend some time learning the basics, and has not much time to do so. Key Features: * Over 30 different types of ships, you can upgrade and add new technologies * 4 types of star maps, the most common ones are shown at the beginning of the game * 4 different opponents AI, including human players * Choice of 7 different languages and many audio selections * The ability to freely design your own ships and add new types of weapons * Numerous bonuses, tips, solutions, and power-ups Terrific gameplay, try it, and you won't regret it. In a month long challenge starting on April 1st, Bethesda has a couple of challenges being offered for players to take on and help the non-profit organization. These challenges don't require the player to use any mod, they can be played as-is. But they do contain certain bugs, which the player can report on. You can click on the link to visit Bethesda's official website for this and the rest of their challenges.Cureworld: Wilderness big news with this release is that I, the only author of this mod, am going to disappear and go off into the wilds of Australia to be cured of whatever it was that caused me to stop modding. Instead of just walking away from modding entirely, I am going to take my knowledge of modding, apply it to developing a new game, and hopefully make a mod that will make the world a better place. This means that the development of this mod will largely be happening without my direct input, and you will not be able to find any more information about it. Because I am going to Australia to be cured of my affliction, any feedback I receive from the community will come from you guys. However, I do still want to know what you guys think of the mod, so I will continue to post updates here and on the Steam page, and I will keep in contact with my community of players to let them know of any changes to the mod.Alpha 1.8 Released! in this version: - A couple of minor, non-gamebreaking bugs - A completely overhauled and updated version of my Steam Workshop viewer - Steam server changes to handle large amounts of user data a little better// Copyright (c).NET Foundation.
