What's new:

Divide has reached a Chapter VII! Please see the previous Chapters for additional information. Chapter VII This Chapter Contains Spoilers The Supreme Ruler Ferdinand IX! Originally, two high-rank officers were summoned to be the public minister and the prime minister. That was before the recent tragic death of the public minister, and so the High President decided to create the position of the new public minister. However, he didn't include anyone to be the public minister, but didn't invite any applicant at all. Only the name of the president was written in the Minister's power list — Miena's name. This situation very briefly raised the public's ire as it was considered that being a president who decides to sack the public minister and create a new one will result in a weak nation. During the case of the crisis, however, it became the common sense that, as Ferdinand made a decision with his own hands, the public minister who protested against it could not be there. The North Wind Country. Snow where the wind shows. It was a day like today, but the surroundings are quite different from today. The area where the majestic Alps is located is a border region of the North Wind Country. There are many similar villages in the North Wind Country, but there are many who seek to go there. The fishing ground above the mountains was equally clear, clear enough such that no one can stand out. There were many mountain gulls and some stork flying around. This region was like a land where nothing was possible to know, existing because of the appetite for the lives of others. If one were to fall into it, it would get lost in the mountains and never be able to return to the South. It was a place with no hope of survival. Ferdinand appointed Camito as an official observer for the

Irregular Military of the North Wind Country. It was a man in the black uniform with a helmet over his head, and the number that Camito didn't recognize — 78 — was printed on the collar. "Yes, I'm a friend of the Forest City," Camito said arrogantly. There were two individuals with the same uniform. Ferdinand hasn't thought of looking into the Brigades lacking two officers. A group of dental surgeons sought to create a more effective method of combating oral bacteria and the damage caused by them, since products such as toothpaste and oral antiseptic remove only 99.9% of bacteria. After much study, they came to the conclusion that the only way to eliminate 100% of bacteria would be to eliminate them individually. So they partnered with the military to develop a micro-robot that could stand in front of the bacteria, eliminate them and repair all the damage done by them. And this micro robot was christened Flurius. Given name in reference to sodium fluoride (fluorine), which is the substance used in oral hygiene products most known to people, and serve as fuel for your jetpack.
