most complete analysis and advice of any game. Work out who likes to create, dribble, shoot or press the ball and consider **tactics** like man-marking and formation changes to help your team find its best. - **The New 3D Dynamic Feel.** Step onto the pitch with each step taken by your players changing the physical appearance and feel of the ball. Feel the environment rise and fall as you lead your players through tackles, with sand rustling in the breeze or the grass springing back into life after footsteps or a low pass. Enjoy the dynamic off-pitch physics that see players and fans rise and fall into the stands at half-time, and the stadium slowly building up to match the swagger of the sidelines.

EA SPORTS FIFA is the most comprehensive sports video game and one of the world's best-selling sports video games. It puts you into control of the world's best professional clubs, players, and national teams on all the biggest stages, from the English Premier League to Copa Libertadores. FIFA gives you the tools to dominate your friends and rivals across more than 300 authentic leagues and tournaments, while mastering each opponent's unique style of play. And with FIFA Ultimate Team™, you can build your own squad and become your own coach. What's new in FIFA 22? EA SPORTS FIFA 22 makes the difference between success and failure in soccer (or football as you will find it called in the UK) even more dramatic than before. We've made fundamental gameplay advances to open up game-changers like set-pieces, and delivered an all-new experience across every mode. New gameplay systems include: **PASSING SKILLS** Decisions aren't just made on the pitch. Successful play depends on successful communication. There are over 500 unique lines to choose from across the pitch when you're passing the ball to a team mate. The ultimate passing screen has been redesigned to put even more pressure on the receiver. **PASSING THE BALL** Suicides have always been a feature of the game, but will you be able to get the ball to your teammate? Passing the ball has become far more refined. Now defensive players have much more control over how the ball bounces. **SETPIECES** The set-piece game has been dramatically changed. Attackers will now get the ball on dead-ball situations more often, and the risk of losing it has been increased. To deliver the best experience, we've combined the stats and scoring features of free kicks, penalties, and corner kicks. With more than 70 new foot skill animations, players will be able to make their most difficult decisions in world-class detail. **TRANSPORTATION** In FIFA 21, players would often be caught out on the wing by a full-back running directly at them. No longer. In FIFA 22, players will perform more often and more effectively on the counter-attack. **COACHING** Sitting in the dugout has never been easier. Analyse your tactics and player movement in real-time, and watch as the game unfolds before your eyes. All this and more in
