AutoCAD Crack +

Production (multiuser, most often used with AutoCAD LT) is the user-oriented version of AutoCAD. It allows multiple users to work on the same drawing simultaneously. It has no in-memory database and uses files instead of the registry for storing information. It is an older version of AutoCAD; since its release in 1999, other products have come to market with "multiuser" functionality such as AutoCAD LT, Autodesk Digital Works and Autodesk Architectural Desktop. AutoCAD comes with a number of help systems. The standard help function offers only a selection of contextual help, and the more extensive topic based help is provided by the topic engine. There are also built-in help systems for AutoCAD itself, and some products have support for online help via Internet help. AutoCAD is part of the Autodesk family of products. Products such as AutoCAD LT, Autodesk Digital Design, Autodesk Construction, Autodesk Civil 3D and Autodesk 3D Total contain AutoCAD. Products such as AutoCAD Architectural Desktop, AutoCAD Electrical and AutoCAD R13 are based on AutoCAD. History AutoCAD was first released by AutoDesk, the makers of the AutoCAD and AutoCAD LT series, in 1992. It was developed by a team led by Bill Steinman. The original name was "R13", standing for RapidCAD 13th revision, for the 13th revision of AutoCAD that AutoDesk released in 1992. It was the first version to support mouse input. Later versions were named "R14", then "R15", then "R16". Its first release with an English name was AutoCAD R17 in 1994. In early 1993, a beta version was made available. It was named "R13 beta". It was available for MS-DOS and Windows 3.x. It was missing many functions including tools, which were later added to the final release. In June 1994, a beta version of AutoCAD was released. This was made available for MS-DOS and Windows 3.x. It was missing many functions including tools, which were later added to the final release. It was based on an earlier and incomplete version of the R17 code. AutoCAD 2.0 was released in 1997. This version was based on version R22 of the R17 code. The name ca3bfb1094
