. to play and download 2 Idiots Tamil movie for free. download hindi.molecules-24-03080],[@B46-molecules-24-03080]\]. Researchers believe that BFR can bind the TNF- α promoter and prevent nuclear factors from producing TNF- α \[[@B47-molecules-24-03080]\]. Recently, it

was reported that TBFR inhibited TNF- α production in RAW 264.7 macrophages stimulated with lipopolysaccharide, suggesting that TNF- α is one target for TBFR in tumor cells

[[@B48-molecules-24-03080]]. Studies have shown that the oxidative stress induced by antineoplastic drugs was an important factor in the occurrence of DNA damage in tumor cells, which led to cell apoptosis [[@B49-molecules-24-03080],[@B50-molecules-24-03080]]. The impact of TBFR on oxidative stress should be considered and is still unclear. DNA damage and programmed cell death may be associated with the changes in TBFR concentrations in vitro, but further studies are needed to confirm this hypothesis. 4.

Materials and Methods

{ #sec4-molecules-24-03080 }

===== 4.1.

Preparation of TBFR

{ #sec4dot1-molecules-24-03080 }

----- TBFR was synthesized

according to the literature
\\[@B26-molecules-24-03080\\]. Briefly,
rifampin (250 mg) was dissolved in acetone
(20 mL) and toluene (200 μ L) was added.
TBFR was added and the reaction was
monitored using thin-layer chromatography
(TLC). After 20 min, the reaction was
stopped by adding a saturated solution of
sodium bicarbonate. The aqueous solution
was extracted three times with ethyl
acetate. The organic layer was dried with
anhydrous sodium sulfate, then evaporated
under vacuum to a volume of 10 mL. The
crude product was purified by silica gel
column chromatography (gradient elution
with petroleum ether and ethyl acetate) to
obtain the pure substance of TBFR. The
structure of TBFR was characterized using a
FT-IR spectrophotometer and LC/MS. 4.2.
Cell Culture and Treatment
