THE FUTURE

We had a lot of great ideas during the creation of Tarnished, however, we didn't want to limit it in our studio. As a result, we decided to branch out and make new action RPGs. As of now, three titles are under way. One of them is the the Legend of Mana RPG which was originally commissioned by Mipsel and licensed by Atlus for the Nintendo 3DS. Another is the Dark Souls RPG. And the last is Tarnished.

Mona the art director created the appealing character designs and the familiar universe. We hope that they'll be comfortable and suited to the players of any genre, regardless of their preferences.

We would like to ask for your understanding towards us.

There are currently more than 30,000 items on our site. In addition, the stories have been updated and there are many long-awaited characters to be made. Please try out the game, and most of all, we hope you'll enjoy it.

What's new:

The free demo of he seventh installment of the Dynasty Warriors franchise, also known as Warriors All-Stars, has been available on the Xbox 360 Virtual Console for some months now. However, the demo has only been available to those with Japanese or New Zealand IP addresses. In a recent announcement, Capcom has officially announced the addition of the demo to U.S. players, granting all North American Xbox 360 owners the chance to test out the opening chapter of Dynasty Warriors: All-Stars before it hits the shelves on September 15, 2003.The expected delay between the announcement and the official release is due to the fact that the version number for the game has changed from 7.5 to 7.1, making it the first in the trilogy to have a lower number than the others. We don't know for what reason this change was made, but it is likely a simple, uneducated mistake. Post CommentEnter the details of the comment you'd like to post in the boxes below and click the button at the bottom of the form. Again, I'm sorry but every one of your points are wrong, or misunderstood. Honestly, are you serious? You suggest switching to the PSP version. This is not the same game. The X360 version is the exact same game except it has exclusive DLC. This is the exact same game that is being sold at the same price as the original X360 version. We're getting the better version. That's the bottom line. If you're unhappy with the only change being that the DLC is in Japanese or whatever your complaints are, feel free to buy the original version. It's the same game. By the way, if you were offended by my post about Dragon Quest 9/10, I apologise. Hopefully I didn't offend you. Anyways, I'm off to play some Dragon Quest 9. Post CommentEnter the details of the comment you'd like to post in the boxes below and click the button at the bottom of the form. Hmm. I'm actually down in Japan and I can say it a few key issues: * * X360 only, not other regions. In fact, it will be the very first *Dreamcast exclusive title in the entire PS1. Personally, I think this is a good thing but I could see it bugging some consumers. *Limited time only. In fact, it's likely that they will not relase it, since they could technically announce a PC version.

Discrepancies of cost coverage within the liability system. During the first months of 1987, the New York State Legislature passed the "Industrial Insurance Marched States' Rate Wars" legislation, the first legislative intervention in the so-called rate wars between the Insurers and their employers. For State Employers having 50 employees or less, alterations in rates were allowed only for claim payments above designated dollar thresholds. Within the liability insurance environment, an anomalous proliferation of large Self-Insured Retention Arrangements (SIRA) by employers, increasing by 69 percent from 1986 to 1987, has occurred. Employers have been able to piece together sufficient financial resources to cover their potential SIRA liabilities, for reasons that include lower administrative costs and personnel-related benefits. Employers with large SIRA liabilities have available insurance resources that surpass liabilities potentially covered by State Workers' Compensation and Employer Liability Insurance Fund (SLIF) funds. Employers incurring SIRA liabilities of less than \$30 million could be legitimately classified as Consumer Cost Intermediaries (CCI), while larger SIRA's are commercial cost intermediaries. SIRA's are also available for new, acquiring employers. The growth of SIRA's in New York deserves the attention of policy makers more than the rate wars.Q: Use the relation $|x-z|=|x|-|z|$ to prove $z\in(-x,-y)$ Use the relation $|x-z|=|x|-|z|$ to prove $z\in(-x,-y)$ So this is what I've done, I've set $x=
