The error-related negativity (ERN) and the error positivity (Pe) were measured in a Stroop task in healthy controls (N=20) and patients suffering from schizophrenia (N=16) or schizotypal personality disorder (SPD, N=16). The SPD group was additionally divided into non-amotoric and amotoric subgroups. The presence of ERN in the correct trials was reduced in the SPD subgroups compared to controls. The Pe amplitudes were enhanced, independent of the presence of ERN. These findings might be an expression of a general cognitive impairment of the SPD group.Microsoft, which considers Windows Phone its main mobile platform, is ready to give the Windows Embedded business another shot at Android The Windows Embedded team is ready for another try at Android, Microsoft's chief Windows evangelist Steven Sinofsky confirmed Tuesday. Responding to a question from TheStreet at the Build conference in San Francisco, Sinofsky replied, "We are very interested in Android, and certainly I would consider Windows Embedded as an option as well." Microsoft's Windows Embedded OS is an embedded version of Windows. It was the operating system of choice for PCs and servers for many years and is still used by manufacturers of industrial and embedded devices such as routers, printers, data centers and cash registers. Windows Embedded is also available as part of Intel's chip-set-based Atom platform. Since Intel acquired the company in 2009, Microsoft's MSDN.com website has been selling support for the product. However, the operating system has been unable to boost its share, and last quarter, Windows Embedded shipments were down 17
