Karen is a psychological horror game, depicting a helpless department store employee trying to kill the monster named Karen. The player begins each game in the spawn room, in this room there is a gun safe. The player doesn't know the passkey to access the shotgun inside said safe. The goal of the game is to search the map for the notes that make up the password. Once all five notes are found, the player must return to the spawn room, where they will use the password to grab the shotgun, and KILL KAREN! Additional Notes: - Karen cannot move whilst being looked at by the player - The notes are currently just a big white cube - Don't get caught Please be gentle! I'm a novice with Unity and can't figure out how to make the tile get bigger/smaller based on if it is near the player or not. Currently, when the player is near the tiles I need to reach the goal, I only get as far as the first tile. Any help would be greatly appreciated! (Just to give you an example of what I'm trying to do: Script using UnityEngine; using System.Collections; public class MapModule :

```
MonoBehaviour { //Moves player to the tile public void movePlayer() { //tile boundary int tileWidth = mapTile.GetComponent("TileWidth"); int tileHeight = mapTile.GetComponent("TileHeight"); //manually update the position of the MapTile mapTile.transform.position += new Vector3(0,0,1) * tileWidth * tileHeight * Time.deltaTime; } //Similar to move player, but only updates the tile if the player is too close to it public void moveTile() { //tile boundary int tileWidth = mapTile.GetComponent("TileWidth"); int tileHeight = mapTile.GetComponent("TileHeight");
```

Tiny Troopers Features Key:

This soundtrack was specially made to accompany this great game. It covers a wide range of styles from a turbulent assault, to a hauntingly haunting feeling as you stare down the barrel of the rifle storm. Sounds have been paired with images to create a cinematics package that awakens memories of a time when the gun became a weapon of liberation.

The soundtrack is uncompressed and ready to be used right out of the box.

Customer Reviews Sep 12, 2012 - 6.2 / 10 - 6 out of 7 Gamers liked this game Gameplay: 5.0 /10 - A good game - the designers should have aimed a bit more at making the game more addictive, and the gameplay could be made to be a bit more absorbing and involving Graphics: 5.0 /10 - Big improvement over the previous version - this is a great game, and I will recommend it to anyone who asks for it! Originality: 5.0 /10 - This is definitely a sequel, the gameplay mechanics are all pretty much the same. But it really is a sequel and not a remake - the graphics are so much better! This game really stands out from the pack because of the graphics and it's also free to play and even free to download. There's quite a lot of the gameplay very nicely tied into the graphics too. Addictive Factor: 5.0 /10 - This game definitely has quite a lot of the addictive factor going on! There's plenty of replayability because there are many different types c9d1549cdd

In this video, we cover how this game came to be, how the changes for a western launch have been implemented, and what our expectations are for the game. My Life as a Man, and how Everything

What's new in Tiny Troopers:

Undernauts: Labyrinth of Yomi is a point and click adventure video game. The game was developed by Creat Studios and published by PlayValue. It was released on November 11, 2013 for the Nintendo 3DS, costing £19.99 / \$29.99. Plot The story takes place in an alternate universe where the Labyrinth of Yomi has been sealed away and an evil witch Nanna Jett, has become obsessed with finding a new planet to inhabit. As a result, she has brought out the ancient eons-old villain Shambli to make it happen. With the help of Randolph and Jeth, you must travel through the dungeons and collect eons of wisdom to find a way to save the world from utter destruction. Gameplay The game is a classic point-and-click adventure, where you guide the characters through several walkthrough levels to find the pieces of a puzzle that can be used to open different magical doors that lead you to different parts of the labyrinth, including secret levels and hidden chambers. Horseback Riding In most areas of the game, the protagonists Randolph and Jeth use their power to hoist themselves up onto flying steeds, a horseback riding feature that is a major part of the game's mechanics. Players need to place a magic item onto a horse's back in order to ride it. The item of power has several effects, including the ability to hover and fire missiles. If a 'Mounted Power' item is placed on the horse, it will ride above all other items and thus allow for the horse to cover more ground quickly. The protagonists can also ride through both solid and invisible walls, impale enemies on

the horse's back, and seemingly fly over large bodies of water. **Magical Missile** The magic weapon used by Randolph and Jeth is the magic missile, which is used to fight the witch Nanna Jett's forces. Inside an item called a 'Wands Power Box,' the two characters are able to place a magic wand on their back, after which they can fire a magic missile at targets that come within the reach of the magic wand. **Money** The money the protagonists are able to save and purchase resources such as potion or gold in the game is called 'coins.' Inside the local money bank, players can use arrows to lock and unlock bins of money, and swap a coin
