I would like to make some changes to it but don't know how. In the file: public class DownloadProcedure // class used to download the build from the internet { public void Download() { string host = "ftp.assemblyx.com"; // the server we connect to string userName = "user"; // the username we're using to login to the FTP site string password = "password"; // the password we're using to login to the FTP site // open a web connection to the FTP site. WebClient client = new WebClient(); client.Credentials = new NetworkCredential(userName, password); // get a list of the files on the server. client.DownloadFile(string.Format("{0}/file.zip", host), // location of the file on the remote server "c:/ftp/file.zip"); // filename of the file on the remote server } In the Main class, I tried to start the download: FileUpdate file = new FileUpdate(); file.Download(); But this gave me an error: System.IO.FileNotFoundException: Could not find file test.zip. I think I'm starting the download properly but it can't find the.zip file? Can anyone help me figure out how to download a zip file properly and get it to open properly? Thanks! A: Firstly, download the zip file instead of a file: webClient.DownloadFile(string.Format("{0}/file.zip", host), "c:/ftp/file.zip"); And then create a zip stream from that (or from the downloaded file, if
