It's working fine when i am using file input. But i want to pass the path of the uploaded file to a function so that i can show it in a another view. For this i am trying to take it by `$ionicFile.file` and `$ionicFile.url` but not getting the path. `$ionicFile.file` is showing the file name and `$ionicFile.url` is showing the path of the image in which the html is. Please let me know how to get the file path of the uploaded file. HTML Add Typescript `add() { var file = this.ionicFile.file; var url = this.ionicFile.url; console.log(file); console.log(url); }` A: Ionic provides a lot of file related methods for the ionicFile component. For example, you can use the modify method to manipulate the file before uploading it. Something like this would work: `var file = this.ionicFile`

Features Key:

Looping mode, play in random or pre-set pattern

Realistic counters

The possible reason: effective gator trapping. Alligator trapper and hunter Brian Bush leaves wetlands near Apopka after releasing trapped alligator in Lake Atlanda. More than a dozen alligators have been trapped and removed from the wild in Apopka, giving the city its first "alligator bumps" in at least 25 years. The Gators, a private alligator trapper, has the lake surrounded by a permeable wall of 8-foot-high, oak wood fence posts. Each post is slotted a half-inch or so off its base to make catching alligators easier. "You can run your hands through the wood, and all the little holes will work with alligator teeth," said George Catron of the Florida Fish and Wildlife Conservation Commission. Bush said he caught the first two this year, clearing the way for 13 alligators found since the beginning of the year. The

animal population, he said, normally hovers around 15 to 20 during the summer. Some of the earlier captures did help the population gain more than other recent trappings. "Every time I trap an alligator, I know people are out there trapping. That's improving the population," said Bush, a 26-year agency veteran. Bush traps the alligators with a small capsule on the end of a 5-foot, hollow-handled cane pole, a hollow tube surrounded by fence posts and controlled by a trigger mechanism. Bush said he targets the alligators that are 100 to 125 pounds and caught a 6-foot alligator last week. "We've had good yields this year," he said. Apopka Lakekeeper Michael Brehm said the number of alligators has increased over the past two years, but not substantially. He has

Q: Riemannian manifold is locally isometric to \mathbb{C} Let M be a smooth manifold of dimension n . Show that every local isometry f of M is of the form $f(x) = e^{2i\theta(x)}$ where $\theta: M \rightarrow [0, 2\pi[$. I know that it is sufficient to show that the Lie algebra of local isometries can be identified with $C^\infty(M)$ via the diffeomorphisms of M . If G is the set of smooth functions $\theta: M \rightarrow \mathbb{R}$, the mapping f is a diffeomorphism if and only if $f^*(\Omega_\theta) = \Omega_{f^*\theta}$ and Ω is the standard Riemannian metric. Does somebody have any suggestions on how to proceed? A: It's not too hard. Let X be the vector field generating the local isometry. Since $\mathcal{L}_X \Omega =$

$\frac{d}{dt}f^*\Omega(t)|_{t=0}$, the flow ϕ^t of X satisfies $\phi^0 = f$, $\phi^1 = \text{Id}_M$, and $\phi^t = f$ for $t > 1$. Denote by $\pi: U \rightarrow V$ the first-order approximation of ϕ^t , with $\phi^t = \text{Id}_M + O(\epsilon)$

What's new:

by Jan Spruaert “The soundtrack to an original movie”. At first glance, the adjective, ‘original’, doesn’t exactly apply to Monstrum. Monstrum is a Dutch horror-thriller premiered at Le Jeune Festival in Belgium in October 2017. Never before has a ‘horror-thriller’ in the same vein of films like Saw and Hostel been made in The Netherlands. The film tells the story of Alexander, a young art student in a painting class who makes a stunning discovery. What he opens upon it is a door into a second world of strange creatures, artifacts and ruins. The first edition of the soundtrack was released by Monstrum ‘s own label, Shanti Music, of which we are all-too-familiar with, for their account on Instagram. But before we jump into the somewhat exclusive nature of their release, let’s take a quick look at the movie itself, and Monstrum themselves for those who are yet to explore the horror genre in The Netherlands. A little bit of the story Tod uit Woede, elk instanten van Alexander’s leven: de sterrenvlakte wordt geklemtoon. Om te overleven moet hij ervoor dat dit einde niet het einde van alles wordt. Monstrum, a Dutch horror-thriller that will premiere at the Le Jeune Festival in Belgium on October 14, 2017. Directed by Goukamma. Language: Dutch / Cast: Alessandro Masini, Marcel van Vlerah, Muriel Colle, Yoosha Roohi The film’s synopsis: Alexander is a young art student in a painting class. He makes a stunning discovery: during an outdoor break his teacher opens the sunflower and there he makes the astonishing discovery that immediately leads him to the fabulous silence. He opens the door and enters a strange world: strange ruins of machines, creatures and stuff. Tod uit Woede, een ondergang die op snelheid berust: een vloek hat Alexander de stipte strijdtijd. Hij zag hem vernagen in een onmenselijke wanhoop. Door die krant uit Woede was het dan ook
