The most innovative feature is the zero-motion blur screen. The LED TV from LG is capable of displaying refresh rates of 120 Hz, 240 Hz and 300 Hz. This is possible with two new technologies: the dual LFB and the contrast-activated backlight. It is the first LCD TV with 4K capabilities from LG with a warranty period of 3 years. A huge set of smart functions were created for the new television and are available via the interactive UI. With plenty of motion processing options, the LG 42PQ2000 also offers a wide selection of 3D content. The television makes use of a media processor called Smart TV, so you can navigate between content from your PC, tablet, or other Internet-connected devices, even if they are not connected at the same time. The TV comes with a Freeview tuner and is ready for Bluetooth remote controls. Touch screen 6.0 offers intuitive and natural navigation of services and entertainment. The new processor promises sharper pictures, less blur and lag-free images. LG Connect is the comprehensive software for social networking and sharing in 4K. Combining TV, video, music and photo sharing, LG Connect has an "all in one" user interface that brings content together. One of the important features of the 42PQ2000 is HDR-10 certification. It is capable of displaying 4K HDR content with more colour contrast and wider colour spectrum. Additionally, you can watch 4K content and 3D programs in HDR-10 format. Packed with even more Smart features: The best software for a smart TV is part of the LG Smart TV Platform. This software offers an intuitive and smart user interface. It brings content together, manages applications for a smarter TV and offers a framework for distributing content through services. It
