My problem is, EAGLE keeps appending whatever board data I design and/or put into the app. I do not want that happen. So I just delete the app and rename it back to "EAGLE". But, I cannot find any other app called "EAGLE". I want to keep the same app name as "EAGLE" and being able to open old boards as well. Does anyone know how to achieve this? A: I have the exact same issue and I have also found a solution. Go in Start menu and type "GAGLE" and you will see EAGLE as an option. Now, you can make the new EAGLE to open even if you keep naming it differently. A: Thank you so much guys. I had finally solved this issue by deleting the existing "EAGLE" and opening it. Apparently, EAGLE was still on my system. I should have gone to the %appdata% folder and found the "EAGLE.exe" file and removed it. I just feel there should be an option to be able to keep the same name (which is "EAGLE"). I didn't want to delete the file and then be forced to rename it as "EAGLE" as if the old app was still installed. Thank you again guys. -Chef3d5e6d72 The vascular endothelium is a major regulator of the vascular system. An active role for the endothelium is that of a detoxifying tissue, where endothelial cells participate in the filtering process of the blood, as well as in the regulation of vascular tone, leukocyte-endothelial cell adherence, and platelet aggregation. Recent studies suggest that the endothelium plays a role in haemostasis. When activated, the endothelium is able to modulate coagulation processes, fibrinolysis, and platelet activation. The endothelium is able to influence coagulation through the release of thrombomodulin (TM), a
