Do you have to download the Docker client on your computer? Does the Docker Windows client allow you to view a version history or generate a unique public key? Requirements for using the Docker client: First off, I must say this is a really amazing service. I've been using it for a few months now and I've only come across one small issue. The only downside I have to what I think is a good thing is that I can only see one instance of Docker running at a time. I really like this as it keeps things neat and tidy. [1] [$\sim \sim \sim$ diogoreis > I really like this as it keeps things neat and tidy I agree. The alternative to docker is to run a container over another container, which is much less elegant, ----emehrkay Should I be watching IO scheduler while using this? I just noticed that /proc/diskstats didn't list my Ext4 FSes. Wondering if this is a problem with file system or what. The present invention is directed to a circuit and method for detecting a baseband transmission, such as a pulse width modulated (PWM) signal, from a power line carrier communication system. More specifically, the circuit and method of the present invention detects the baseband transmission from the DC component of the voltage on a power line, the received DC voltage corresponding to the power line carrier communication signal. Baseband carrier communication systems have been in existence for many years. One particular baseband carrier communication system, described in commonly owned U.S. Pat. No. 6,144,641, has been implemented on a power line so as to transmit electrical power via a power line. In addition, PWM-based power line carrier communication signals have been developed and are disclosed, for example, in commonly owned U.S. Pat. No. 6,980,224. The signal output from a PWM power line carrier communication system is a relatively low voltage signal, for example, a voltage having a DC component between, for example, 0 and 200 milli-volts (mV). FIG. 1 shows a conventional circuit 10 for receiving a PWM power line carrier communication signal
