There are different ways to solve this type of problem. You can pick one that suits your budget, features and needs. The online auction website allows buyers to bid on items. Others can buy from you as well. While some of the items on the site are new, some are used but in good conditions. Depending on the sale, sellers can accept cash, check, credit card or bank deposit as payment. Even if no bids are made, sellers can use the service to save money. Once a bid is made on a specific item, the seller enters the delivery, payment and return dates. The auction site has a convenient calendar that shows the date, time and location of the auction. You can view the auction, bid on it, remove yourself from it, see recently sold items, and pay for it all in one place. For security purposes, the identity card of the buyer is not accessible in this type of website. However, personal data and financial information are disclosed only to third party shipping companies. You must be 19 or older to buy and sell on this site. Furthermore, you can only use the service in the US for purchases and anywhere in the world for sales. To buy more than one item, you need to share your shipping address information. Setting an item as a favorite allows you to access it easily. You can also create a wish list to check out items that you want to buy later. When an item is available for buying, you will be notified by email or by the system. You can make your bid in a secure way. The seller can view the bids, and you can bid also. Just make sure that you enter the amount that you are willing to pay for the item.
