

VAG ELSAWIN 5.2 Electronic service information, with complete repair information mainly on new cars 1986-2011, wiring diagrams 1992-2009. VAG ELSAWIN 5.2 is one of the most sophisticated electronic service programs currently available. For this you need to have access to the VIN, at least. In order to save the data in the program, it is necessary to have full access to the system via K-line. There are several formats for storing data that can be saved in the program and then retrieved if necessary. These are files with the extensions \*. FDT and \*. FDB. The program supports the 5 most popular file formats.
