there has to be some way to pull it off. I tried the whole swap cable thing and when I ran into the same thing. I made sure I didn't have a power plug on the back of the laptop close to the right side of the battery. It would go from full to almost full to full then back to almost full. I tried shutting the system down and \hat{A} . Subsequently, download it from our website or from the link in the mail that is inserted.
