## Acan Mini Laser Engraver

most units will give you cutting times in the range of a few seconds for 2.5x3" cutters. bigger, slower, more complex cuts will take longer, so the amount of time you save depends on the task you're setting the machine to do. the main advantage of laser cutters, particularly if you're working with durable materials like wood, stone or leather, is the ability to engrave text or symbols in. set the machine to laser speed, set the depth to 0.2mm and a good sharp blade will make it easy to create a deep, clean mark that won't soon fade. this may seem like an excellent choice for those in the business looking to speed up their processes. engraving your calligraphy or logo on a product is quick and can save you a ton of money, but not all products can take the rigours of a laser. so, if you want to engrave your logo into a piece of jewellery or cut out a special pattern into a rug, then the best option may be a smaller engraver. if you're looking to use a laser to mark your product, explore the best laser cutting units for your budget below. if you're just starting out, one of the best ways to narrow down the options is to do some research and find out what you're after. there are good desktop laser engravers that will do a ton of cool things at a reasonable price. not only will you save lots of cash, but you'll also save a lot of time as it's often easier to print a design than cut it. a desktop laser engraver can be a great companion to a more traditional manual machine, like a ballpoint pen or engraver. the laser provides the precision you want, and with an engraver you'll have the better control over the speed and the pen pressure to make sure your line is perfect.
