
Golden Axe By BonusJZ

The Ultimate KA mod by BonusJZ. Choose one of the. Both should be in the same location and setup. They are pretty much the same aside from the First or Original. That one is slightly safer but you may be able to keep your files on that one as it is slightly smaller, except for the Games. Save Games aaaand the Kart Data somewhere else. If you can't find it you can search for the kart name through the internet. They are the same except for the Kart Name and the music. If you wish to insert the original music in a folder on the Hard Drive you will need to unzip the.pac file and rename it with the folder name. The music folder will be named after the folder name you gave it before you unzipped the.pac. If you use the Original Game you will have to make sure that you have a match setup and start up the game like all the other ones except for for the Rope. For the rest use the Original Version. PSX Button and.PAC Files are available in my profile. If you find it odd in the settings for the game that there are 2 different game title in the game itself and the installed game then that is correct. There are 2.PAC files in the directory that one is for the original one and the other for the one released by BonusJZ. The GUWANGER version is meant to be the Grand theft auto of the KA series. That means that it should last the longest and most levels completed the most. The KA is more based on the Gta and the its possibilities in playing it more like racing. The mod that I made for it is also intended to be more serious in playing. The second game is more for comedy and fun and is a mod of the first game. This version was created for nostalgia and fun. I admit to downloading a version of it in the KODE editing area but that version was only for fun and the control was awkward so I did not keep it long enough to finish it. The Guy will be able to easily play it again for pleasure and play a more relaxed way. It also has its own mode where the Guy can play on the level that he wants. You may have fun in the game play but you can also add stages easily and your character is very easily customizable. A best of both worlds. Have fun Note: All of the files for the Original Game are above. Click the link to download them. NOTE2: The 2nd to last stage with the 2nd game is missing. The music is from the 2nd to last stage for the 2nd game but the game is long and hard. So if you get stuck in the 3rd or 4th stage then move on to the 2nd. It will be somewhat similar to the last stage. NOTE3: All of the below files are the same except for the files from the Original Game.
