X-rite InkFormulation 6.0-adds 1

InkFormulation Software Product Packages Recommended System Requirements InkFormulation is available in four configurations; you only purchase the functionality you need. InkFormulationPrinterBasic A cost-effective system designed for small to medium-sized printers. Easily and quickly formulate custom inks working with a database supplied by your preferred ink manufacturer. Configured with an X-Rite Color Handheld device, this solution is ideal for the printer that previously could not justify having in-house formulation capabilities. InkFormulationPrinterPro The standard package for most medium-sized to large printers. The X-Rite InkFormulationPrinterPro allows for ink formulation via XML, and supports more colors than do the other two versions of the product. It also features RFID technology to help with traceability of ink, media, and paper when storing and warehousing assets. You can configure it with no change in software, just an update to the extra hardware. InkFormulation Software is a complete color management and measurement solution, designed for: printers, packaging converters, etc. The new X-Rite Color Software for in-house or client use is intuitive and easy to learn. Easily formulate and quantify a wide range of inks and pigments. Easily print custom plates for both desktop printers and high-resolution printers. Easily process and store large volumes of data. Easily print labels and tags. InkFormulation Software can be installed on your local PC or network server. If you install the software on a local computer, you can access your custom ink formulation with the X-RiteColor Handheld CM-5000. If you install the software on a network server, you can access your custom ink formulation with your favorite X-Rite Color software such as the X-Rite Color Software or ColorBuild. For more information, see the System Requirements section of our X-Rite Support article. 5ec8ef588b
