It took about 3 weeks for the device to be shipped to us, and then another couple of weeks for the team at Livarno to get through all the work to put together a solution. Since you told me that you're in Belgium you can imagine that this is quite a slow process. Basically a team in the headquarters checks the device to see where the problem is, we provide them with the written information regarding the situation, and they then call you to make a decision as to how to proceed.
