the beat of the songs is often called the chocobo beat, and is a prominent feature of the series. the chocobo is a relatively rare summon, and the summon is automatically obtained in the distant glory heroes storyline for players in the los angeles, eternal dragon, and antarctica maps. it was also used in final fantasy vii: advent children, as the main theme for final fantasy vii: dirge of cerberus: final fantasy vii. after the release of final fantasy vii: advent children, the theme was later re-recorded and used as the "final fantasy vii remake" theme for the pc release of the remake. it was also used in final fantasy ix as part of the opening. in the late 1990s, "chocobo music" was adopted as a term to refer to various styles of japanese music in computer games and anime. the term, which was coined in the late 1980s, refers to the combination of techno, house, and rock, as synthesizers were added to the mix. the use of chocobo themes as a gaming theme can also be seen in titles such as final fantasy xiii-2, in which a pseudo-chocobo theme song "the third wish" plays during the start-up sequence, and in final fantasy xiv: a realm reborn. in the game final fantasy xiii-2, the single player plot focuses heavily on the acquisition of power and money, and is revealed to be a homage to the first final fantasy game. the game was also one of the first to introduce the ability to choose a character to play as, which resulted in a number of changes to the overall design of the game. for example, one of the major changes was that the cloud characters were redesigned to be less childish, more like the adult versions of the characters in final fantasy vii. for example, cloud was originally depicted as an adorable, young child. 5ec8ef588b
