## Sins Of A Solar Empire Rebellion Trainer 1.03 4243 Fixed

glad to see it working now. this has been driving me crazy for the past week. i had to move the folder (the same one that the installer used) that wemod was in to the sins folder. then i reran the installer and it worked. i hope this doesn't break in the future. 1. a few days ago, i ran a trainer and was unable to use it. i never had this problem before. now i can run the trainer and access all the cheats, but when i play the game i get an error message that the trainers have failed to load. i have tried all the fixes in the faq and none of them work. i have tried using the standalone trainer as well and get the same error. 3. in the trainer, if i right click a ship, it tells me that i cannot click a ship if i don't own it. i did not have this problem in the standalone trainer. i can still click the ships in the game, just not the ones i don't own. 6. i have a radeon 6400 video card in my other computer. i have tried to run the trainer on this computer with no luck. i have tried running the trainer without the standalone program and using the standalone program with no luck. 7. i have tried installing sins of a solar empire 2.2.5.1 on two other computers. on both computers i get a popup that says "your operating system is not supported by this version of sins of a solar empire." is there a way to make sins run on my windows 7 64-bit computer? i also tried downloading the sins of a solar empire 2.1 game from steam. when i run the game, it works fine. there are no errors, but it also won't load the trainer. i am really surprised that no one has been able to make a trainer or mod that allows the gamers to play as a normal player. as i stated before, i am all for cheats and trainers but would like to see a trainer that can activate as a normal player. i know that there are mods that will do this, but then we have to open up our game and hope that the mods don't cause the game to crash. so, as a player, all i want to do is play the game without having to worry about the time it takes to open the game and then close it. why can't a developer put in the cheat that allows a player to play as a normal player?

## Sins Of A Solar Empire Rebellion Trainer 1.03 4243

the sins of a solar empire: rebellion trainer is used for making a custom version of the game. the trainer has been designed to be very easy to use, and a good way to learn the basics of the game. however, the trainer is not limited to the sins of a solar empire: rebellion game. if you want to change the game, you can easily do that. the trainer is just a tool that lets you do that. the sins of a solar empire: rebellion trainer is designed for sins of a solar empire: rebellion, but there is nothing special about that. this trainer is designed to make a custom version of the game, and it can be used for any game that supports.exe files. the sins of a solar empire: rebellion trainer is designed to be very easy to use, and a good way to learn the basics of the game. however, the trainer is not limited to the sins of a solar empire: rebellion game. if you want to change the game, you can easily do that. the trainer is just a tool that lets you do that. if you don't want to cheat, can you get a trainer that allows you to change the factions, difficulty settings, and more? i am really curious if it's possible to change this without purchasing the trainer to do so. well, i have my own problem. i have the trainer but i haven't been able to get it to work. i thought it would be easy but it didn't work at all. i got dev.exe, which i am assuming is the way you all are supposed to get it to work, but after running it, it didn't do anything. i had to run it again to get rid of the error that it was having. then i got the trainer but it doesn't want to work at all, or doesn't want to work properly at all. 5ec8ef588b
