As previously stated, there are 3 layers of challenges in Passpartout: The Starving Artist. You need to complete all the side quests, beat the game, and finish the campaigns. For those, you will need the help from the

NPCs, or at least to feed them. This cheat helps you to level up faster so that you can spend more time with your skills and more time of your time on other things. All you need to do is start your training system again and start leveling up every 3 hours at full health. At first, you'll be spending almost a full day on this. The game moves to the next level when your character reaches level 10, and the max level you can reach is level 20. As you play and level up, you can choose how much stamina you want to increase, and you can use that stamina to continue playing again. You can also make your character stronger, by selecting your desired class, and choosing that you want to be a Paladin or Wizard for example.
