Read our guide to how to play these great PC games for free. First-person shooters are the most common genre of game to be ported to the Mac platform. The genre provides a consistent experience across all platforms, ensuring that all Mac users will play. However, first-person shooters are not inherently Mac-friendly. They are known for having a notoriously buggy gameplay experience, and Mac users frequently have to deal with terrible performance, awkward controls and numerous other problems. Here are some of the best Mac games for first-person shooters, in no particular order: Vanguard Vanguard is a free action-RPG that puts you in the shoes of a player who is leading a military unit into the fringes of the galaxy. With your spaceship and your weapons, you'll be able to explore planets and fight against fierce alien enemies. Vanguard does feature a strong storyline, along with a great single-player campaign. It offers a free trial period, and the developers release frequent updates, such as new items for you to collect, new maps to play on, and new enemies to fight. Vanguard is available for OS X 10.7 or later and Windows Vista or later. Mac OS X 10.6 or 10.5 users will not be able to play it. Airborne Airborne is an excellent game of cat-and-mouse, a first-person shooter that sends you on a killing spree on a small island where you must kill everything that moves. Like many games on this list, Airborne has a strong story line, which makes it well worth your while to play the game through. The game offers a fairly lengthy single-player mode, along with a co-op mode. Airborne is available for OS X 10.7 or later and Windows Vista or later. Mac OS X 10.6 or 10.5 users will not be able to

play it. Back to the Future Back to the Future is a game that puts you in the shoes of Marty McFly, a young man who must travel back in time to try to prevent his own death. In this free and modernized take on the first-person shooter, you get to explore f988f36e3a
