Jan 28, 2018 1 10 Protea AntiVirus Tools for Lotus Notes/Domino Protea AntiVirus Tools for Lotus Domino Review: Particularly good for the following solutions: Protea AntiVirus Tools for Lotus Domino is a part of the e-mail security suite called JumpBox Protea AntiVirus Tools for Lotus Domino. JumpBox Protea

AntiVirus Tools for Lotus Domino is a standalone tool for enhancing the security of your Domino mail by scanning and cleaning it automatically.

JumpBox Protea AntiVirus Tools for Lotus Domino provides real-time automatic scanning and cleaning to keep Lotus Domino databases and mail safe from viruses and other malware.

PABTLD controls the scanning, cleaning, and quarantining. The security solution for Lotus Notes provides built-in protection against a variety of potential threats, including viruses,

spyware, Trojans, worms, keystroke loggers and more. This e-mail security solution protects you from these threats by scanning, quarantining, and cleaning your e-mail messages. The tool also offers many other benefits, including comprehensive security alerts, and security-oriented configuration. By using this e-mail security solution, you can eliminate the risks of having mail viruses and spyware infect your e-mail messages and spread to other systems or devices. In addition to scanning mail

messages, PABTLD also provides on-demand e-mail virus scanning, a central web access control, and automatic database protection.

JumpBox Protea AntiVirus Tools for Lotus Domino also comes with a lot of highly configurable security options. To configure the security, access the security center from the JumpBox Protea AntiVirus Tools for Lotus Domino installation. This e-mail security solution scans and cleans mail messages and your Domino databases without slowing down your e-mail delivery. The JumpBox Protea AntiVirus Tools

for Lotus Dom

[Updated]**

Protea AntiVirus Tools for Lotus Notes/Domino - The first and only comprehensive antispam solution for Domino eMail The first and only comprehensive antispam solution for Domino eMail

JumpBox is a full featured, Web-based eMail content filter which manages the anti-spam, anti-phishing and anti-virus duties of your Domino mail server, from

the Administrator's console. It brings all these functions together in a single, secure web site. Unlike other antispam solutions, it enables you to distinguish between legitimate mail from the people you want to receive it, and spam. JumpBox includes several types of eMail filter; tailored to the particular needs of Domino users: Protea AntiVirus Tools for Lotus Notes/Domino provides users with the ability to scan their mail as they receive it in real-time. It scans all messages as they arrive in the Inbox and as they are

archived or deleted in the Archive Folder. Every type of Domino database can be scanned. Scanning is done entirely within the Domino environment without altering any of the message. The scanner scans rich text fields and OLE attachments as they arrive in the mailbox. No negative impact on mail delivery is seen. Scanning never happens on the same mailbox twice. All scans are logged and can be viewed from the Admin Console. Protea AntiVirus Tools for Lotus Notes/Domino is very easy to

install and to configure. The installation tool installs and configures JumpBox in a few minutes. Protea AntiVirus Tools for Lotus Notes/Domino is also Web enabled. The Control Center features easy access to the status of a Domino mail server and other key details. Most of the servers supported by JumpBox can be controlled from a single centralized server. The JumpBox Control Center is a simple, centralized Web site that provides easy access to the status of a Domino mail server and other key details. Most of the

servers supported by JumpBox can be controlled from a single centralized server. About JumpBox Protea AntiVirus Tools for Lotus Domino Product Key
